Greenmaster Double K

High potash, phosphate-free turf hardener

Greenmaster® Double K is a unique, phosphate-free, fine turf fertilizer with a novel two-to-one potash to nitrogen ratio for improved growth and enhanced disease and wear resistance on greens where potash is low but phosphate is not recommended.

- Satisfies latest recommendations for high potash inputs.
- Provides 42kg/ha potash but only 21kg/ha nitrogen when applied at 30g/m².
- Overcomes potash deficiency, controls soft growth and helps turf resist disease.
- Phosphate-free formulation limits P build-up and *Poa annua* establishment.
- Low nitrogen application allows use throughout the year.
- Ideal alternative autumn treatment where phosphate levels are adequate.

Greenmaster Double K

REAL WORLD TEST
Shallow Aerators
 GREENKEEPER INTERNATIONAL

Another significant advantage of the machine was its flexibility to reduce the tine spacings without the need for spanners. At Bristol both hollow and solid tines are used, mostly at spacings of around two inch and three inch. Operating depth is down to four inches but this was wear dependent, with about two sets being used per season, but this was not regarded as excessive.

Maintenance and servicing is "quite easy" with guarding easily swung aside. John said that setting up the rockers correctly was particularly important.

Last year the club hired a Shattermaster which improved drainage so that it is virtually certain that one will be hired again or even purchased this year.

Toro Hydroject, at Walton Heath Golf Club, Tadworth

Clive Osgood, Course Manager at Walton Heath, stressed that the

Clive Osgood, right, with the Toro Hydroject

hydroject should not be seen as a complete answer, but simply an additional and complementary option to other methods. At Tadworth, with two courses, they have a range of equipment including a deep tine aerator as

well as slitters.

The principle use is to reduce surface capping on greens, however the machine is also used to treat areas of high wear and trafficking. The most significant advantage of the machine is that it leaves a clean surface which can be played over immediately.

Although the name Walton Heath implies light sandy conditions, in fact the native soil is acidic heavy clay which needs regular opening up. Having two heavily used and prestigious courses makes it possible to justify the Hydroject, but Clive admitted that it was not a cheap machine to buy. Nevertheless running costs

are not high, there have been no repairs and minimal maintenance, and water usage is not heavy. Clive considered that the provision of a trolley to carry the hose (behind the machine) between holes would add to its attractiveness as would a lower price.

At Walton Heath they have no problem in getting the jet to penetrate down to 10". The machine is now in its fourth season and was first bought because the concept looked right to Clive. Certainly the fact that play is only interrupted while the machine is on the green gives it a significant advantage over most other forms of aeration.

ALTERNATIVE DECODERS BY

Tonick Watering

Guaranteed Compatibility & 3 Year Warranty

- Long Life – designed to last for at least 10 years
- Competitive equivalents to **Watermation, CIC, Wright Rain, Primetime, Robydome, Robydome Mk III** and **TORO**
- Guaranteed to work perfectly with your controller
- Stocked and fitted by nearly all independent irrigation installers
- Most makes of controllers serviced and repaired by Tonick
- Simple, rapid testing and address settings with our low-cost programmer
 - Tests your existing decoders as well.

Shake off those chains! despite what controller manufacturers say, you are no longer tied to your original decoders. Specify Tonick and put an end to irritating and expensive decoder failures.

TONICK decoders will work with all leading controllers – and the range is growing continuously. All types are available with 1,2,3 or 4 independent solenoid outputs.

The unique low-cost TONICK programmer allows quick simple address setting, tests new and original decoders. The car battery adaptor allows use of the programmer on site – no need to take decoders back to base for testing or address re-setting. Saves time and money.

IT COULD BE YOU

It could indeed be you sitting astride this fine Toro Greensmaster 3100 and will be if you become the first ever winner of the Toro Award for Excellence in Greenkeeping.

The main prize in the new Toro Award for Excellence in Greenkeeping is enough to make every greenkeeper in every golf club in the country drool.

The Toro Greensmaster 3100 is

a ride-on which makes the task of cutting greens a pleasure.

Among the features of the Greensmaster 3100 are:

- A new hydraulic oil leak detector system
- A superb quality of cut
- It is the lightest in its class so minimises compaction
- It is strong on fuel conservation and noise reduction
- Quick response power steering
- Excellent after-sales back up service

The Toro Greensmaster 3100 is just part of the prize to the winner of the Toro Excellence in Greenkeeping Award. The individual winner will also be flown to the United States for a two week all expenses paid visit to the Golf Course Superintendents Association of America Conference and Show, as well as a trip to visit the Toro Company's Headquarters in Minneapolis and its factory in Riverside California.

There is still time to enter, or nominate someone, for the Toro Award for Excellence in Greenkeeping. **May 30** is the closing date for entries.
