THE DRENCHER

Wetting Agent RANGE

DRENCHER
GRANULES

- ❖ Stimulates beneficial soil bacteria
- ❖ Contains high content of natural sugars
- ❖ Enhances water penetration of dry or compacted soil
- ❖ An essential weapon to combat dry patch
- ❖ Trial data available on request
- ❖ Low scorch potential

The Drencher Range of Wetting Agents offers a formulation for every situation and location. The Drencher Range contains wetting agents in liquid, granular and pellet form with Drencher Applicator Guns available for both Drencher Liquid and Drencher WA and Drencher 1-2-3 Pellets.

- ❖ Easy to apply
- ❖ Stays on target
- ❖ Higher active content means less product is required consequently fewer refills are needed
- ❖ An easy way to treat hard to reach areas such as banks and high spots
- ❖ Perfect for use in horticulture
- ❖ Enhances water penetration of dry or compacted soil
- ❖ Small particle size allows for use on even very low cut turf
- ❖ Extremely cost effective, 5Kg per 500m² (100kg per Hectare)
