

Thanks to Sierrablen I needn't feed my turf again for the season.

No wonder Sierrablen® is the leading controlled release fertilizer. It puts you in control and keeps you there, because it feeds your turf with the specific nutrients it needs, for up to nine months. The result is hard wearing, durable turf with a consistent colour.

There's great product choice and flexibility with just one application lasting 2 to 3, 5 to 6 or 8 to 9 months – a complete growing season. This saves you both time and money and avoids potentially damaging wastage.

So, when life's as busy as yours, it's good to know you can relax and rely on Scotts, the company that brought you the original CRF and still gives you the best results, whatever your turf needs.

Why not give us a call on 01473 830492. We promise that we'll keep your turf well fed.

Sierrablen®
Bringing quality to play
