

GreenTek's **NEW** topdressing method Easier, Faster and Smoother!

1

Get an *Easy-Load* to do the hard work for you!

Who can afford to spend hours of backache just loading a topdresser these days?

No One!

Not when you can buy an Easy-Load from just £91 per month that will transport and load your topdressing in an easy one-man operation. And with its massive 16" wide floatation tyres it's also the handiest general purpose golf course trailer you're ever likely to come across!

2

Rub-in faster with a *Greens Groomer*

If you're still using a metal drag mat to rub-in your topdressing it's time to get onto the Greens Groomer.

The bristles of its 14 separate brushes quickly work the sand down in between the blades of grass instead of scraping it across the top like your drag mat does. So you get a better job done with less passes and no bruising.

DEMONSTRATION
NOW!

Finishing the job off is only the start of their usefulness.

Sure, the lightweight True-Surface Vibratory Rollers will make a superb job of vibrating the sand further down into your greens to help save it blunting your cutting cylinders. But that is by no means all!

They will also polish your greens for a faster ball roll, true up the surface after aeration, and can be used instead of mowing the day after spraying, or when your greens are stressed.
