

A chip off the old block

Awesome in Autumn and Winter, Chipco Green has got it all.

Why? Because no other fungicide is so widely trusted to control and prevent a huge range of turf diseases, whilst leaving beneficial fungi unharmed.

And its rapid contact action and rainfastness means it performs just as well during the damp winter months.

That's why Chipco Green is still the most established and widely used fungicide in the UK.

And even though it's not called Rovral any more, it's still the No. 1 in disease control.

Use with Mildothane Turf Liquid or Capricorn as part of a programmed approach
