

# the power of nature harnessed by HERITAGE

Following further extensive research and development work, HERITAGE now has labelled recommendations for the control of **more diseases than any other turf fungicide in the UK:**

- Fusarium Patch
- Leaf spot / Melting out
- Take-All Patch
- Brown patch
- Fairy Rings
- Rust diseases
- Anthracnose

*HERITAGE - the **only** systemic strobilurin which protects the plant as it grows.*

The origins of HERITAGE are in the natural fungicides produced by wood rotting fungi found on the forest floor.

Syngenta has harnessed the power of these naturally occurring fungicides to produce a truly broad spectrum turf fungicide with an excellent environmental profile.

Used on its own, or combined in a programme with other Syngenta fungicides like BANNER MAXX and DACONIL WEATHER STIK, as part of an Integrated Turf Management plan, HERITAGE is the naturally powerful way to keep your turf disease free.
