

The Sportcrete Bunker System

Simply the Best

Sportcrete are working with some of the leading architects, consultants and golf facilities to create the best bunkers in the world. The innovative Sportcrete Bunker Lining and Drainage System is the way forward in bunker construction. It incorporates an engineered base that eliminates contamination and a totally integrated drainage system with hydraulic properties that ensure no standing water and minimal washout.

- 5 Year Performance Warranty
- No sand contamination
- Bunker shape retained
- Free draining – up to 2,000mm per hour
- Minimal washout
- Reduced maintenance costs

“ *The Sportcrete product is simply the most effective bunker lining product we have seen! We monitored the initial bunkers installed with Sportcrete and have seen for ourselves the enhanced fast-drainage system. Bunker maintenance is markedly reduced in the Sportcrete bunkers, that's why I had no hesitation in asking Sportcrete to install the system in all our bunkers.* **”**

Cameron McMillan, Course Manager, Queenwood Golf Club
