

The secret of the superb cut? In a word – balance.

The Greensmaster genius is in the details

The Toro Greensmaster 1000 delivers an unrivalled quality of cut on fine turf, a standard that can only be achieved by exploiting every little opportunity to increase performance.

For example, the unparalleled consistency of cut for which the Greensmaster is renowned owes a lot to its front weight bias, which compensates for the operator's natural tendency to lean a little on the handle. This ensures that the reel can follow the ground contours more faithfully, resulting in a superb cut.

Obvious when you think about it. Which we do – it's our job.

Greensmaster 1000

With its legendary cut, the Greensmaster 1000 is the industry's most popular greens mower. Its many features include unique front weight bias, designed to ensure the reel follows ground contours faithfully while also ensuring accurate straight-line tracking.

The whisper-quiet 3.7hp OHV Kawasaki petrol engine has easy access to service points and the sealed gearbox and drive belts require no lubricants that can damage your greens. Even the grass box is designed to eliminate spillage.

The revolutionary Flex 21

For when you require a really close cut! Cutting down to 1.6mm without scalping, the Flex 21 features dual-axis suspension, flexible cutting units and a flexible drive shaft for a full range of movement that follows even the most undulating greens.

Greensmaster 3250-D

With a mono-valve block design, no camshaft or detents and 17% less hydraulic connections, the mechanic-friendly Greensmaster 3250-D makes leak prevention a priority on and around your greens.
