

ELMS CAN BE PROTECTED AGAINST THE DUTCH ELM DISEASE, WITH, MINIMUM RISK TO BIRD LIFE

They tell us — Methoxychlor, 1,1-Trichloro - 2,2-bis ethane, a contact insecticide, has been shown by extensive field tests to be effective against the European elm bark beetle, carrier of the Dutch elm disease. Although Methoxychlor remains effective on the elm trees for as long as DDT, it will not endanger the existence of wild life nor cause death to song birds.

Methoxychlor now makes it possible to protect both the elm trees and our birds.

Nels Johnson

Al and Mrs. Hintz, of White Pines Country Club and Ed and Mrs. Stewart of River Forest Country Club and Marv and Mrs. Gruening of the Midwest Country Club all vacationed before attending the meeting at Houston. They went to the Gulf to Ocean Springs, Miss. to the Gulf Hills Country Club a dude ranch where they rode horses, went swimming and had a good time. Marv, the mighty westerner is said to have shown the southern cowboys just how horseback riding should be done, at Gulf Hills.

LANDSCAPER'S PRESENT GRANT TO ILL. TURF FOUNDATION

On February 15, 1960, in the absence of President Vincent Dernbach, Thomas King officiated at the regular monthly meeting of the Chicago Metropolitan Landscaper's Association. The well-attended meeting was held at Louie's Restaurant at Addison.

Highlight of the meeting was the presentation of a financial grant from the landscapers group to Mr. Ben Warren, Palos Park, president of the newly founded Illinois Turf Foundation. Warren, who heads the Warren's Turf Nursery, was very appreciative of this grant and the interest of this group and extended his thanks and best wishes to all members of this organization.

In presenting the main address of the evening, Warren explained the aims of Turf Foundation. He stated that it was their intention to coordinate the research on work done nationally and to test adaptability and observation of new grasses, weed killers, crab grass killers, diseases, etc. The association of turf growers and affiliated businesses works with the University of Illinois. There will be basic and practical research and Warren cautioned the group not to be too critical of new products and methods regardless of their present apparent impracticability.
