

1st Hole at new "ROLLING HILLS COUNTRY CLUB"

The paths are 8 feet in width made of Hot Mix Asphalt two inches thick over four inches of gravel. The path surface is flush with the soil surface.

Many of the paths are used to maneuver the steep grades. To avoid erosion that is common on normal

road surfaces that are raised in the center for better drainage, they have built theirs with the side of the road a little higher than the center so the water will run down the center and prevent the sides from eroding. The paths are very neat looking and well planned. They should last a long time. Some of the roads were even banked for safer driving.

AN INVITATION TO PLAY ROLLING GREEN

John Coghill and Dudley Smith have extended an invitation to all membership classes of the Midwest Association to play the new Rolling Hills Course at the Silver Lake Country Club on Thursday, October 10, 1963. Golf will begin after 12 noon and will be free. The "Open House" is being conducted for those people that would like to see and play one of Chicago's newest courses. Make up a game and come on out. Everybody is welcome.
