Why Insist That Engineers Seal Plans

The Illinois Professional Engineering Act requires all registered engineers to obtain a seal showing their name and registration number. They must stamp with their seal all plans, drawings and specifications prepared by them or prepared under their supervision.

The following are some of the reasons for the above requirement.

AN ENGINEER'S SEAL ON PLANS . . .

1. . . . is a symbol of competency, for to use such a seal a man must be qualified through examination and registration.
2. . . . pinpoints responsibility and tells the client who actually was responsible for the design.
3. . . . gives stability, quality and authority to plans and drawings.
4. . . . seeks to protect public health, safety and welfare.
5. . . . provides legal record, long after the project is completed one can look back at original plans and determine the person responsible.
6. . . . makes it difficult for unregistered persons to falsely claim engineering capability.
7. . . . establishes a criteria, for persons without seals have probably not passed their registration examinations.
8. . . . lends dignity to the engineering profession.
