June 1970 delivery**

SEWER PIPE CALCULATOR SLIDE RULE

A convenient, pocket-size sewer pipe calculator slide rule is being offered free by Certain-teed Products Corporation, manufacturer of pipe products. An 8-page booklet of instructions and suggested uses is included. The new slide rule is useful in helping engineers, sewer system managers, and others involved in water pollution control to estimate requirements, and to determine the most economical pipe size for optimum results in any system. Coefficients are derived from the Manning Formula. The reverse side of the slide rule is a pressure pipe calculator. To receive a free calculator and booklet, write to Certain-teed CAP Division, 540 Pennsylvania Avenue, Ft. Washington, Pa. 19034.
