

SIMPLIFY TIME CARD STORAGE AND HANDLING

The TYMINDEX Division of Weber & Sons announces its new system for storage and handling of time cards both before and after use. The TYMINDEX time card file provides a simple, easy to use container and a place to keep time cards for the three years required by law. In use the system works this way: With the file full of un-used time cards, pull the drawer toward you about five inches; now pull string to lift time cards and remove a week's supply of cards. Then, at the end of the week, store these same cards in the back of the file (push drawer out the back of the sleeve — about five inches). Do this weekly until the TYMINDEX file is full of used time cards. Now write "beginning and ending" dates in the space provided on the drawer front and store the time cards for future reference. TYMINDEX files are available either full of time cards or empty and there is a size to fit all standard time cards and tab cards. For more information write to TYMINDEX DIVISION, Weber & Sons, 17 Koenig Lane, Freehold, New Jersey 07728.
