Watch where you store paraquat. The Environmental Protection Agency is cautioning herbicide users to pay special attention to the label precautions on weed killers containing the compound paraquat. The EPA warning came in light of several reported poisonings, apparently involving accidental ingestion of the chemical. In Hawaii, one of the poisonings allegedly resulted in the death of a teenage boy. In California, another teenage boy is currently hospitalized in critical condition, the cause tentatively listed as paraquat. Both incidents apparently resulted from the boys drinking the paraquat herbicide from unmarked beverage containers.
