### "THANKS FOR THE SUPPORT"

Running for the office of GCSAA Director was a most rewarding and enlightening experience. To lose was, of course, a sad moment. You run with the hope and determination to win, but to lose is only part of the game. To quote someone else's words, "More important is how you play the game."

The "Midwest" went to the conference with its ever present interest in the National affairs and support for me. We made our points and may have added some constructive criticism which, as we well know as golf course superintendents, are sometimes hard to accept. The support I was given was more than expected — to think about such a loss for more than a moment would be fruitless. The important thing is to have people working together for a common goal. The Midwest, along with other sections of Illinois, did this down to the last man, and I hope we can extend this effort forward this year.

My thoughts wander to questions such as, "What was accomplished and what was gained for the future by supporting a candidate for GCSAA Director?" We showed that our Association can run a candidate and back him with the necessary support to, if not become elected, make a showing that is respectable. The future should be brightened with the togetherness and mutual efforts put forth this year by the Midwest Association.

Thanks again.

Our deepest sympathy is extended to William Leath and family due to the death of William's father. Mr. Leath served for many years as a golf pro and golf course superintendent. His service was appreciated by his many golfing friends.
