GROZYME SOIL CONDITIONER

For five years Grozyme has:

- Improved the tilth of tees, greens and fairways.
- · Softened hard, dry turf.
- · Improved drainage of wet areas.
- · Made greens soft, more playable.
- · Helped roots grow deep in soil.

THINK FOR YOURSELF

Most people, simply by applying a few sound principles, could think more effectively than they do. Too many of us are awed by the experts, preferring to let them do our thinking for us. We fail to realize three fundamental principles about thinking, which, if recognized, will strengthen our confidence in our own ability to think!

 Knowledge doesn't come from books—it comes from human observations and deductions. That's how it got in the books in the first place. The most important knowledge we possess comes from observing and thinking, not from reading books or listening to professors.

It's always worthwhile to try to think for yourself.
 Study the available facts and apply your own imagination and logic. Sometimes you can find the right answer—or perfectly good answer despite lack of experience.

3. Be wary of the "expert". If what he says doesn't agree with what you have seen and deduced for yourself, make allowance for the fact that he may be wrong. Books and experts often are. — John Luther Reprint—Divot News (So. Cal. GCSA)
