BULL SHEET, History

Norm Johnson conceived the idea of an official publication for the Midwest GCSA. At the time, he was the superintendent at La Grange Country Club and treasurer of the MGCSAA.

The first meetings and the development of the "Bullsheat" took place in Norm's office at La Grange and often ran into the late evening hours. Ray Gerber and Bob Williams were the assistant editors with Paul Burdett acting as our roving reporter.

The "Bullsheat" was originated in 1947 and the same printer has been used for these past 31 years. (in La Grange). The name was suggested by Bob who had used this title for an Army bulletin he edited during World War II.

The first issues were one page mimeos with no advertising. Norm was a good Samaritan and began sending copies all over the country to many local chapters and superintendents. The cost of postage and printing grew rapidly and we finally decided we needed advertising to help defray costs. At first, we only allowed 1 inch ads at \$5.00 each.

Editors for the past 31 years, in order —

Norman C. Johnson, Donald S. Strand, William Stupple, Bert Rost, Ted Woehrle, Doug Jabaay, Tom Burrows, Richard Trevarthan, Roger La Rochelle, Ray H. Gerber.

Paul Burdett eventually became the unknown "Mole" with a monthly column concerning personalities and inside information that kept people guessing for a while as to who the real "Mole" was.

Editor's Note:

Richard Tufts, long a member of the U.S.G.A.'s Rules Committee, stresses what he calls the "two great principles" of the rules of golf; first, play the course as you find it. Second, put the ball in play at the start of the hole, play only your own ball and do not touch it until you lift it from the hole.

"Play the course as you find it", could also be the basic principle of a course in department.

ANSWERS TO HOW'S YOUR TURF IQ.

1. "LD50" is the dosage of a chemical, which when ingested, injected, or inhaled, kills 50% of the test animals involved. It is usually expressed as weight of chemical per unit of body weight.
