

RESEARCH UNDERWAY—

California Polytechnic Institute, Pomona
Studies with Zoysia cultivars in the southwest involving establishment, adaptation and water use, and iron efficiency.

University of Florida, Ft. Lauderdale
Evaluation of turf-type bermudagrasses for sod web-worm resistance.

Iowa State University
The mode of action of leafspot development related to light and herbicide effects on leaf physiology.

Michigan State University
Development of procedures to enable the prediction of plant disease occurrence.

Texas A&M University
Water management relating to stress and drought.

SPECIAL GRANTS (One time)

Michigan State University Library
For continued support toward book acquisition and microfiche facilities for O. J. Noer Memorial Turfgrass Library.

Len Berg & John Berarducci. Passing of the gavel.

“MANAGING CHANGE” — NATIONAL CONFERENCE THEME

Change is a fact of life for golf course superintendents. They constantly face new challenges to their ability to deliver a quality product with ever decreasing resources. As we move further into the 1980's, shortages of energy, water and other resources will undoubtedly worsen while golf's demands increase.

These are challenges GCSAA is prepared to face. The Association's program for its 1981 Turfgrass Conference and Show January 31 - February 5 in New Orleans will be aimed at helping its members deal with the problems they may face in the not-too-distant future.

Under the banner "Managing Change", GCSAA will offer eleven educational presentations on topics ranging from finances to tree management to golf carts. Highlighting the program will be two, three-hour symposiums on water and the challenges it will offer in the coming years. Panels of nationally recognized experts will attack the problem from several angles, providing a wide base of information to help superintendents plan for the future.

These sessions are in addition to the USGA Green Section's Educational Conference which will occupy an entire day of the conference week. Activities also will include an expanded spouse program, the Turfgrass Trade Show, GCSAA's annual meeting, social functions and a tour of the Louisiana Superdome.

A complete conference brochure and registration forms will be mailed to all GCSAA members in late October. Make your plans now to attend what may well be the most important GCSAA conference in history.
