SAFETY IN MOWING

Attractive turf requires good mowing practices and proper mowing means sharp cutting parts. Rotary mowers in particular seem to be responsible for a large number of careless accidents. To insure safer mowing, the following precautions should be observed.

1. Remove the ignition wire from the spark plug before sharpening the blade or removing debris from under the housing.
2. Make certain that hands and feet are away from the blade before starting the mower.
3. Never refuel a hot engine. Make certain the tank and cap do not leak. Fill the tank on the driveway, or sidewalk, away from the lawn.
4. Remove all debris, rocks, toys, sprinklers, etc., from the lawn before starting to mow.
5. Never pull the mower backward. This greatly increases the opportunity for accidents.
6. Keep children and pets away from the mower while mowing. Never allow small children to operate the mower.
7. Do not allow anyone to stand or walk beside the discharge ports.
8. Stop the mower whenever you leave for just a few moments.
9. Try to avoid mowing turf when the grass is wet. It is difficult to cut properly and footing may be uncertain.
10. Mow across steep slopes and not up and down. Try to wear shoes that assure good traction.
