### **USGA Turfgrass Information File**

The USGA Turfgrass Information File (TGIF) provides computer-based bibliographic access to published materials relating to turfgrass research and management. The file is operated as a part of the Turfgrass Information Center at the Michigan State University Libraries. This USGA research project, in cooperation with GCSAA, first became operational in August of 1984 and now includes more than 9400 references, most of which (approximately 85%) include abstracts.

File Purposes and Uses

As a file designed to support the efficient and effective retrieval of research results, TGIF can be exploited to identify source documents discussing particular grasses (or cultivars, for that matter), cultural practices, agents, research methodologies, environmental conditions, etc., alone or in combination. It is also useful as a reference tool, for example, in tying together disease nomenclatural changes, surveying the state of knowledge on a particular insect pest (in the turf context), or quickly identifying who has conducted research on a particular concern. In many cases, the abstracts themselves can provide management guidance based on summary conclusions. And it is unbeatable at identifying that, "I can remember seeing an article on that about a year or so ago ...", item, and quickly, too.

File Scope and Content

To build the file, current published literature from some seventy journals is selectively processed, including these kinds of sources:

RESEARCH: Agronomy Journal, Plant Disease, Phytopathology, Crop Science, Canadian Journal of Plant Science, etc.

TECHNICAL: USGA Green Section Record, California Turfgrass Culture, Golf Course Management, Journal of the Sports Turf Research Institute, etc.

TRADE: Weeds Trees & Turf, Grounds Maintenance, ALA, etc.

In addition, online files and bibliographics from the National Agricultural Library, Commonwealth Agricultural Bureaux (U.K.), Biological Abstracts, etc. will be reviewed regularly to include materials from sources not usually reporting turf research.

Currently over 1200 different serial titles are represented in the database. Included are journals, conference proceedings, research annuals, newsletters, and extension bulletins in addition to the books, papers, theses and dissertations, and special publications that make up the remainder of the file. Over 95% of the file entries have been published since 1968, reflecting the emphasis on recent materials.

Though significant results can be retrieved on most turf topics, it must be noted that the file continues to be "under construction" and cannot be considered "exhaustive" at this time. Coverage of the literature since 1980 is most complete, with the 1972-1979 period less well represented.

The Setting

Designed to compliment and enhance the existing O.J. Noer Memorial Turfgrass Collection at the Michigan State University Library, TGIF is but one element in a three part cooperative effort to develop a Turfgrass Information Center at MSU. The Noer Collection, based on O.J. Noer's personal library and supplemented by gifts from many others, has now grown and

# TIME

### TIMBERLINE, D.B.A. BILL BOYD

We offer fast, dependable service complete golf course construction and renovation.

Clubs Timberline had the pleasure of working:

Oak Brook Park District Downers Grove Park District Westmont Park District Naperville Park District Butler National Naperville Country Club Timber Trails Golf Club Ruth Lake Country Club Hinsdale Country Club Riverside Country Club

Timberline • 1129 Jefferson • Downers Grove, IL 963-9088

## Mess Kit

# CORTY 30% DISC.

Arm yourself against caked-on dirt, grime, and refuse with Corty.

A hot high-pressure Corty cleaner protects equipment as it dissolves dirt and washes away damaging and unsightly grime. Pressures from 700 to 3000 psi. Capacities to 10 gpm.

Corty's unique steel pipe coil design provides high fuel efficiency. Stainless steel float tank, oil bath pumps and quick disconnect hoses are standard. Pneumatic tires, ball bearing wheels, heavy-duty construction, brand-name components throughout. Standard and upright models are available. Also, some machines of fer combination steam/hot, high-pressure cleaning.

For more information on Corty	war	on	grime,

become recognized as one of the best in the country. The O.J. Noer Foundation continues to provide support for the purchase of historical works and further additions to the collection from a variety of sources are encouraged on a continuing basis. This collection "backs up" the online index to the literature, TGIF, sponsored by the USGA Turfgrass Research Committee. Both the collection and file are operated by the MSU Libraries, which finances and implements the collection development responsibilities.

Searching the Database

The database can be searched by a variety of means, including (as examples only): the presence of a word or words in a title, abstract, or as an assigned index term; author or authors; journal which the item appeared in; time period of publication, by year or years, referred sources only, or any combination of qualifiers. The database is constructed within the STAR database software, which features many search capabilities found only on mainframe-mounted and commercially-operated databases. This flexibility, combined with the speed of execution, makes online searching a powerful aid.

Serving Turf Science, the Turf Industry, and Turf Professionals Services Offered by TGIC

- Searching: To have TGIC personnel construct and execute a search, call or write the Center. Search results will be printed and mailed, normally within 48 hrs.
- Document Delivery: If a citation produced by a search contains an MSU Call Number within the record, a photocopy of the article can normally be sent out within a 48 hour period. (Limited single copies provided for private study, scholarship,

or research only: if a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement).

- 3. **Dial-up Access:** If you are interested in searching the database remotely, please contact TGIC to receive the necessary technical details and registration forms. Dial-up access will be supported for most IBM PC or PC-compatible systems running under PC or MS-DOS with a 1200 baud auto-dial modem and the necessary terminal emulation software. An electronic mail and bulletin board system will also be supported for communications between dial-up users as well as with TGIC at MSU. Documentation to guide search strategy construction, controlling output formats, and download records will be included in the subscription dial-up service. The computer will be available for access 18 hrs/day, 7 days a week.
  - 4. Service Fees: To be determined.

Use the file; the more TGIF is used the stronger it will get. Searches help us to identify scope-of-coverage, indexing, abstracting, formatting, and search strategy needs, and "exercise" and test the database.

Before You Call

Identify your topic concisely, and inventory synonymns, acronyms, or closely-related terms to help in search construction.
