The Ex Stands For Excellence

Why the EX STANDS FOR EXCELLENCE in professional turf care.

Par Ex is the only professional fertilizer line containing IBDU, undisputedly the finest slow release Nitrogen source in the world.

IBDU gives you the highest level of WIN, or Water Insoluble Nitrogen. IBDU delivers all of its Nitrogen in a single growing season.

The Nitrogen release rate of IBDU is generally affected by only two factors: soil moisture and granule size.

Slower release makes Par Ex products perfect for your Fall Fertilization program.

Fewer applications are required, labor costs are cut.

The salt index of IBDU is the lowest of all commonly used fertilizer materials.

IBDU fights nitrate pollution because very little Nitrogen is lost through leaching or volatilization.

Choose from over 60 different product formulations.
