

# Thinking Superintendent

by Fred Opperman, Editor

Art Benson, Jr. of Butterfield and his mechanic built a trailer to hold the electric winch and hose reel for his Toro HydroJect 3000. Art was tired of having two people doing a one person's job and came up with the idea of a trailer. They have 2, 12 volt batteries to run the winch. The winch has a remote control that can be run by the operator at the controls of the HydroJect.

Only one person need go on the job now when using the machine, since everything is on the trailer that is needed.

Trailer showing the 2 batteries, and a filter hook-up for the incoming water to the HydroJect 3000.

## "I never want to work without a TRION™ LIFT again!"

"Before, it was almost impossible to see what I was doing, let alone repair it. Now everything is right where I can see it . . . sitting down!"

"I can save an hour or more a day on maintenance time."

Ed Ward  
Head Mechanic, Highland Hills Municipal G.C.
