

# Cantigny Experimental Green

## Mini-Field Day

Brian Bossert  
Bryn Mawr G.C.

On October 16, more than sixty people enjoyed the first (annual?) mini-field day at Cantigny Golf Club. Those in attendance scoped out the progress of the experimental green and the research projects that have been conducted thus far. A big thanks to Randy Kane for all of his hard work. Additionally, Tom Voigt and Tom Fermanian made the trip from the land of the Big Ten basement to lend their expertise. It's great to have such cooperation within the allied forces. No one went away hungry as hot dogs and chicken breasts were grilled (deeply charred in some cases) by expert Rich Mika and rookie grill master Brian Bossert.

If anyone is interested in the results of the trials and tests, please contact Randy Kane at (630) 954-2753. He has everything nicely compiled in notebook form. ■
