Editor's Note: This first letter is from Paul Knulty to John Berarducci, who coordinates the Annual Charity Gin Tournament. The second is a thank you to those who donated to the fund for Paul's child.

Dear John,

Our son Matthew has Cri du Chat Syndrome, a rare chromosomal disorder that affects his physical and emotional development. Since nine months of age, he has been in physical, occupational, and speech therapy to support his development. It has also caused medical complications that have resulted in major surgeries and many hospital stays.

When Matthew was three months old he failed to thrive. He

was hospitalized at Children's Memorial in Chicago where he was diagnosed with Hirschsprungs disease, a rare bowel disorder.

Matthew had colostomy surgery which allowed his nutrients to be absorbed so he could gain weight. At one year, he had the surgery to reverse the colostomy, allowing him to have normal bowel movements.

At two years of age, it was discovered that Matthew's airways were 70% obstructed. He then underwent surgery that took cartilage from his ear to enlarge the airways. After surgery, he spent nine days in a drug-induced coma on a ventilator so the graft could take.

Throughout Matthew's surgeries and illnesses, he has remained a very loving, happy child. Although he is mentally handicapped and will never be "normal," we are optimistic that he will develop to his full potential.

On the behalf of my family, I would like to thank you for thinking of us.

Thank you,
Paul Knulty
