

# GCSAA Implements New Member Database System

To provide enhanced services and increased flexibility to members, the GCSAA is converting to a new database system in July. This upgrade in technology will expand the association's capabilities and provide members with easier access to membership information 24 hours a day. The new system also will accommodate information relative to the Professional Development Initiative (PDI). Within 18 months, members will have the ability to view their education transcripts online and access other member-related information.

Members may experience a slight delay in the processing of their requests while GCSAA makes this conversion. All information received by the service center and

through GCSAA Online during the month of July will be processed in the order it is received in as timely a manner as possible.

Look for more information in the coming months about these exciting new features and when they will be available.

### Get to the Root of the Problem with BioGain® and Canteen™

Promote healthy grass by maintaining healthy roots.

BioGain® WSP® and BioGain® WSP® (Fe) are a great first start for a root maintenance program. Both biostimulants come in convenient Water Soluble Packets; they enhance water and nutrient uptake, reducing stress and stimulating turf root growth. In addition, BioGain(Fe) contains a 10%

fully chelated iron for use with turf that displays an iron deficiency.

For added efficiency, use Canteen™ spreader and soil penetrant to deliver BioGain more completely into the crown and root zone. BioGain and Canteen—the natural way to healthy roots!
