AUGUST 2010 Volume 64 No. 4

A photo looking from the clubhouse down the 18th at White Eagle Golf Club shows how a water can become a key feature of a golf hole design.

FRONT COVER

The best water is the water we can control through our delivery systems. Every course I visit has some water feature that is an integral part of the design or the irrigation supply system. 2010 has been a year of uncontrollable water for many area courses.

The Midwest Association of Golf Course Superintendents (MAGCS), founded December 24, 1926, is a professional organization whose goals include preservation and dissemination of scientific and practical knowledge pertaining to golf turf maintenance. We endeavor to increase efficiency and economic performance while improving and enhancing the individual and collective prestige of the members.

The MAGCS member is also an environmental steward. We strive to uphold and enhance our surroundings by promoting flora and fauna in every facet in a manner that is beneficial to the general public now and in the future.
