

Arnold Palmer on Vertagreen®

"It doesn't take a professional golfer to *appreciate* professional turf, but it does take a professional fertilizer to *grow* it! Vertagreen has the complete line of golf course fertilizers and protection products that make for *professional turf*."

Vertagreen Tee-Green, Tournament, and Vertanite fertilizers plus Vertagard Turf Protection products can team up to put your course in championship form.

Every product in the Vertagreen Professional Turf Program is made *especially* for golf turf.

And every product is backed by the expert services of your local Vertagreen representative.

"One professional to another, why not give him a call."

WELL DISINFECTION REQUIREMENTS

Where small diameter wells with hand pumps for drinking water purposes are constructed, repaired or reconditioned the golf course superintendent should insist that each installation be disinfected prior to going into service. A concentrated solution of chlorine and water is often used for this purpose; common laundry bleach which is sold at most grocery stores and which contains 5¼% chlorine is ideal for the disinfection of wells when used in the following amounts.

Diameter of well casing	Depth of well	Cups of bleach	Total water Solution
2"	50 ft.	¾	8 gals.
3"	50 ft.	1-¾	18 gals.
4"	50 ft.	3	32 gals.
5"	50 ft.	4-¼	51 gals.

The cups of bleach and water should be mixed in the above amounts and poured into the well casing and kept there for a minimum of two hours after which it should be pumped to waste, this usually takes a minimum of 20 minutes of pumping. A sample should then be collected for bacteriological analysis, bottle are available from all local health departments for this purpose.
