## Balan Stops the annual weedgrasses on your most unwanted list.

Turfgrass management isn't an exact science. Not just yet. You rely on experience, on sound judgment, and on equipment and products that have demonstrated they measure up to your management standards. Balan is the pre-emergence herbicide that does measure up.

USE BALAN CONFIDENTLY. If you've never tried dependable Balan, only one thing will convince you. Actual use. So you be the judge. See if Balan

doesn't give you more dependable Performance for less money than any herbicide you've ever used.

Greater stopping-power against the worst weedgrasses you know. Poa annua, crabgrasses, goosegrass (silver crabgrass or crow'sfoot), watergrass (barnyardgrass), and foxtails.

A better margin of safety when used as directed on established turfs. Perennial bluegrasses, perennial ryegrass, fescue, centipede, St. Augus-

tine, Bermuda, zoysia, and bahia grasses.

The convenient granular. See if Balan isn't easy-handling, smooth-pouring, even-spreading from either drop-type or rotary-type equipment. No messy wettable powder to mix. No poisonous arsenic, lead, or mercury to worry about.

And no wonder. Balan Granular is the one herbicide formulated to make a turfgrass professional's life easier. Why have it any other way?
