**MILORGANITE, still the best fertilizer  
for Golf Courses**

IT'S NEW

**MILORGANITE FINES**

Now available . . . Milorganite Fines . . . a finely ground, non pelletized grade that is excellent for top dressing golf greens or for mixing with seed before sowing. Same proven analysis, trace elements and all, as in regular Milorganite . . . same non-burn all organic compound, but finely manufactured for specific purposes.

Prices: same as for regular Milorganite, and can be combined with regular Milorganite for quantity and tonnage discounts.
