# TORONTO C-15 BENT **SOD&STOLONS**

"PURE TO STRAIN"

Mowed at putting gree height with "Greens King"

For Tees and Collars - FYLKING SOD WINDSOR SOD

For Fairways - BLUEGRASS BLEND SOD

### PENNCROSS BENT SOD

H & E Sod Nursery, Inc. 4301 W. Flossmoor Rd. Tinley Park, Illinois 312 798-2210

### PRECISION BLENDED TOP DRESSING

Custom blended to your specifications by our modern equipment.

### Buy when you need -Eliminate costly storage

We sell an air dried, uniform and free flowing top dressing.

ASK THE MAN WHO HAS USED IT.

HUMUS - BLACK SOIL

### HENRY FRENZER

Area Code 312 658-5303

620 Webster St. Algonquin, III. 60102

#### **PESTICIDES**

A relatively new course entitled "Pesticides" will be taught by Stanley Rachesky, Area Adviser - Pesticides and Entomologist for the University of Illinois Cooperative Extension Service. This course is designed specifically for the suburbanite, demonstrating a balanced picture of insect control for homeowners. It will take in insect identification, life cycles, the principles of effective chemical control and the safe use of pesticides. Vegetable, fruit, tree and shrub, lawn, flower, animal and nuisance, and food, fabric and structural insects will be covered. In short, this course will deal strictly with the practical side of insect conrol. "What is it and how do I get rid of it?"

This course is designed to give a balanced, comprehensive picture of insect life as found in the nonagricultural, noncommercial environment of the urban dweller. This includes insect identification, life cycles, interrelationships with the physical environment, parasitism, disease transmission, and biological control. This course will emphasize the principles of effective chemical control and the safe use of pesticides.

- 1. Introduction to Entomology and Pesticide Use
- 2. Insect Development
- 3. Classification
- 4. External and Internal Morphology

- Regulations Federal, State, etc.
   What is on the Pesticide Label
   Cost Comparisons of Pesticide Pro Cost Comparisons of Pesticide Products
- 8. Insecticides and Formulations
- 9. Toxicity and How It's Measured
- 10. Resistance to Insecticides
- 11. Safe Use of Pesticides
- 12. Biological Control
- 13. Study of Insects that fall into the following groups:

Vegetable	Insects	Pests
Fruit	"	
Tree and Shrub Lawn	"	"
Flower	"	W.
Animal and Nuisance	11	"
Food, Fabric and Structural	"	"

#### Lab. Study:

- 1. Insect Identification
- 2. Films on insect problems

#### GOLF COURSE SUPERINTENDENT WANTED

We are presently in the process of hiring a golf course greenskeeper superintendent for our golf course, which is being presently constructed. I understand that your organization is in a position to provide assistance in locating a qualified candidate for this position. We would therefore appreciate very much your advertising in your publication of the availability of this position.

In selecting an individual, the Park Board would require a written resume of qualifications, a biographical sketch of each individual, and of course, his salary requirements, to be submitted to the Foss Park District at their offices at 1708 Sheridan Road, North Chicago, Illinois, to the attention of Mr. William G. Hamlet, Director.

If you have any question in this regard, please feel free to call me at 336-8510.

Verv truly yours, FOSS PARK DISTRICT William R. Stanczak Secretary/Attorney

#### Continued Inflation?

C. O. Borgmeier

Under the guise of controlling inflation the administration in Washington has actually resisted and combated deflation. Instead of putting into effect a rigid policy of wage and price controls from which there would be no deviation, we have another expansion of the bureaucracy to play around with wages and prices to appease first one segment of our economy and then another. We have transferred the operation of our economy from economic control t political control, which will wind up in a mess. What would be wrong with imposing rigid controls and then using the power of government to reduce wages and prices, not increase them according to the whims of politicians?

Deflation is unpopular with government, union labor, business and agriculture. So the Department of Agriculture is subsidizing and supporting farm crop prices, necessitated by huge increases in production. Large food crops should be a blessing to the nation and should decrease the cost of living by a price reduction in all processed food and that would happen if the Department of Agriculture allowed the law of supply and demand to operate. Instead, it jumps in with price supports and give-away programs to appease the farm industry. The eight billion dollar farm support program is scandalous and a fraud. It is not keeping the young on family type farms but encouraging corporate operations with guaranteed prices and subsidies not justified economically. Union labor is demanding and obtaining approval of outrageous wage increases instead of halting inflation or reducing wages to stimulate certain segments of the economy and discourage the inportation of cheaper foreign goods. Generally the people accepted the August 15, 1971 imposition of the 10% surcharge on imports. The government backed down on this in a hurry when foreign nations threatened retaliatory action.

There is a feeling of shame and humiliatin among many people that this proud nation, supposedly the strongest in the world, has devalued the dollar, once the soundest currency in the world. Now with the withdrawal from South Vietnam our place in the world is degenerating fast.

We can't put the blame for this on President Nixon. It started with our engaging in the no-win Korean War under President Truman and continued under all successive administrations.

Our deficit, the diference between what the government collects in taxes and what it spends, is inflationary because it creates 25 billion annually in additional spending.money. U.S. Bonds and notes are money in a fixed form on which the U.S. Treasury pays interest if held to maturity. When the urge to spend outweighs the desire to collect interest theron they are just so much more money. We are undermining our dollar at home and abroad by this continued fiscal irresponsibility. The recent devaluation of the dollar is just a starter. The same thing will reoccur a year or two hence.

We will continue to have inflation because it is the accepted economic policy. The present administration endorses it, hopefully setting the pace around 4% annually. The financial interests like inflation because it makes for liquidity of loans and debts payable with constantly cheaper dollars. The merchandisers don't object because inventories go up in value on replacement cost and losses are negative. Union labor, while giving luke-warm support to anti-inflation measures, would not forego the periodical demands for higher wages to justify the leader's big salaries and expense accounts with the membership. Industry doesn't object to inflation as long as prices can be increased commesurately.

The free application of the law of supply and demand would have cured inflation if allowed to function both in the field of labor and industry. It probably would have resulted in a severe depression accompanied by social upheaval and violence. So the law of supply and demand was repealed, or its con-

sequences postponed.

The field is all set up for continued inflation, hopefully restrained or controlled, but slowly destructive of the dollar value in wages, salaries and fixed in-

comes.

Rte. 2, Box 582, U.S. 45 & Knowles Rd. Lake Villa, Illinois 312 – 223-8616 FROM: Paul M. Alexander, Director of Education RE: Occupational Health and Safety Act — Exemption Proposal Which Would Favor Many U.S. Golf Courses

The following material was just brought to my attention via my Washington information source (NACA).

Representative Clark Fisher (D. Texts) proposes to radically revise the coverage of the current Occupational Health and Safety Act which became effective April 28, 1971. His proposal, H.R. 11756, would exclude any non-manufacturing business and any business having 25 or less employees.

It would be in the best interest of your chapter members to support Representative Fisher's proposal. Therefore, I have given his mailing address for your benefit, plus the normal method of addressing a U.S.

Representative in a letter: The Honorable Clark Fisher The House of Representatives Washington, D.C. 20515 Dear Sir:

Yours very truly,

Your opinion, either as a chapter or as an individual, can certainly help Representative Fisher to receive acceptance of his proposal.

Joseph Grenko, Director, Superintendent Midlane C. C. (left- and Harold Michels, Director, Superintendent McHenry C. C.

Joseph Canale, President Emeritus, Superintendent Deer Park C. C. (left) and Edward Smith, Director, Superintendent Deer Path C. C. (Center) and Bob Breen, Director, Superintendent Arrowhead C. C.

#### CLEARY PRODUCTS FOR BETTER TURF

PMAS - Disease and Crabgrass Control

CADDY - Liquid Cadmium Chloride Fungicide

SPOTRETE - 75% Thiram Fungicide

THIMER - Broad Spectrum (Phenyl Mercury-Thiram) Fungicide

METHAR — DSMA and AMA Crabgrass Killers (Liquids and Powders)

MCPP — Control Chickweeds, Knotweeds, Clover, etc. in Bents, Bluegrasses, etc.

MCPP+2-4D

ALL WET - 100% Non-Ionic Wetting Agent

TRU-GREEN — Liquid Chelating Agent Contains Iron, Magnesium, etc. (Apply with Fungicides)

CLEAR SPRAY — Liquid Protective Sticker for Grass and Plantings. Extends the Life of Fungicides Summer and winter.
