**MILORGANITE, still the best fertilizer
for Golf Courses**

**No synthetically produced
fertilizer can compare
with MILORGANITE**

If synthetically produced, the plant-food elements contained in every 50 pound package of MILORGANITE would cost approximately \$70.00. MILORGANITE can be sold at a fraction of this cost, because it is a natural product.

Naturally organic MILORGANITE contains ALL of the growth elements essential for healthy plant growth. And it's fool proof! MILORGANITE does not burn... lasts longer... and its sterilized granules are weed-free.
