**MILORGANITE, still the best fertilizer
for Golf Courses**

*No synthetically produced
fertilizer can compare
with MILORGANITE*

If synthetically produced, the plant-food elements contained in every 50 pound package of MILOPGANITE would cost approximately \$70.00. MILOPGANITE can be sold at a fraction of this cost, because it is a natural product.

Naturally organic MILOPGANITE contains ALL of the growth elements essential for healthy plant growth. And it's fool proof! MILOPGANITE does not burn . . . lasts longer . . . and its sterilized granules are weed-free.
