

# Get it on the fairway.

And it's good for the rough, too. USS Vertagreen Tournament Turf Food was developed especially for fairways that have received phosphate over the years and where soil tests show that no additional phosphate is needed. It is also a very economical fertilizer for use on roughs.

With an analysis of 18-0-9 this great fairway product also contains guaranteed formulated amounts of calcium, magnesium, sulfur, zinc, manganese,

boron, copper, and chelated iron.

Twenty-five percent of the nitrogen is derived from urea-formaldehyde and the potash is totally derived from the sulfate form. Everything to keep your turf healthy.

Right now is the time to see your Vertagreen distributor for USS Vertagreen Tournament Turf Food. He can assist you with a soil test and show you the advantages of this premium fertilizer—and he'll help you get it on the fairway.
