

It's good! Pick it up.

It's better than good—it's great! USS Vertagreen Tee-Green Technical Turf Food is designed and formulated specifically for proper fertilization of golf course tees, greens, and aprons. It has an analysis of 16-4-8, and half of the available nitrogen is from urea-formaldehyde.

And here's another thing that makes it great—the uniform particle size* assures an even spreadability. This means the granules will work their way down through the grass evenly,

before your mower picks them up. Also, uniform particle size provides for a more consistent feeding.

When you consider that USS Vertagreen Tee-Green Technical Turf Food also contains guaranteed amounts of important secondary and micro-nutrients, you'll see it all adds up to a premium product. See your Vertagreen distributor, and he'll tell you how you can pick it up—it's good!
