It's not just
the W.I.N.
you use,
it's how you
say the name
par ex

All water insoluble nitrogen (W.I.N.) fertilizers are not alike. Some are activated by soil bacteria. Others by temperature. But IBDU (31-0-0) and PAR EX fertilizer mixes with IBDU are activated very slowly by soil moisture. Nitrogen is released at a controlled, even rate that can't be hurried by high temperatures or excessive moisture.

It's important on high maintenance turfgrass to control the level of nitrogen feeding. Excessive bursts of nitrogen can be a greater problem than a nitrogen deficiency.

Custom formulated to exacting specifications of the professional turfgrass manager, IBDU and PAR EX fertilizer mixes with IBDU provide a controlled level of nitrogen nutrition that stimulates root growth, shoot density, rich green color and improves overall plant hardiness.

Let water insoluble IBDU (31-0-0) and PAR EX fertilizer mixes with IBDU perform for your turf. After all, performance is the name of the game.

A COURSE IN GOLF HISTORY

By Dave Kohl

Although such modern-day terms as "fore", "handicap" and "sand trap" are wildly used, few golfers can tell you where the words originated.

Dave Thomas of San Bernardino not only has one of the world's greatest private golf collections but is also one of the foremost golf historians. Thomas, who is also a PGA pro, explained the origin of the above terms during a golf match recently.

"The terms 'fore', 'handicap' and 'sand trap' actually originated at St. Andrews in Scotland," explained Thomas.

"In the 1770s, all golfers were required to wear red and before each shot had to yell, 'thou are forewarned'. Over the years, the expression was shortened to 'fore'.

"Surprisingly enough, sand traps, a nightmare for even today's finest golfers, came about because of sheep. In the early days and even today, sheep were allowed to graze over the St. Andrews course. The herdsman, however, discovered that a number of their flock were dying off because of the strong, cold north wind that swept across the course. To protect the sheep, the shepherders dug giant ditches to shelter the animals from the wind.

"Most of today's golfers have handicaps when they play but few could tell you where the word originated. It seems that in the early days at the private golf clubs when a less skilled golfer played another he had to wear a cap with a colored ribbon around it to signify that he had been given so many strokes by his playing partner. Different color ribbons meant different strokes. The caps were kept at the clubhouse and placed in a long row so that they would be handy for the golfers. They became known as 'handy caps'.

"Some strange orders have also been handed down over the period of centuries to golfers to stop playing the game and practice archery. It seems their skill as archers was more in demand than their skill as golfers. They were needed to defend the country."

ISN'T IT FUNNY!

Isn't it funny - when the other fellow takes a long time to do something, he's slow. But when I take a long time to do something, I'm thorough.

When the other fellow doesn't do it, he's too lazy. But when I don't do it, I'm too busy.

When the other fellow goes ahead and does something without being told, he's overstepping his bounds. But when I do something without being told, that's initiative!

When the other fellow states his side of a question strongly, he's bull-headed. But when I state a side of a question strongly, I'm being firm.

When the other fellow overlooks a few of the rules of etiquette, he's rude. But when I skip a few of the rules, I'm being original.

When the other fellow does something that pleases the boss, he's polishing the brass. But when I do something that pleases the boss, that's cooperation.

When the other fellow gets ahead, he sure had the lucky breaks, but when I manage to get ahead, man! it was hard work that did it!

Funny, isn't it - or is it!

GOOD OLD DAYS ARE NOW

The Reverend Richard Stephens, Vicar of a church in Cheshire, England: "Our forefathers did without sugar until the 13th century, without coal fires until the 14th, without buttered bread until the 16th, tea or soup until the 17th, without gas, matches or electricity until the 19th, without cars, canned or frozen foods until the 20th. Now what was it you were complaining about?"

USS Vertagreen... A product for all reasons.

For professional turf products you just can't beat the Vertagreen lineup. And this complete array didn't just happen. It's the result of many years of experience, testing and proven use—designed and formulated to meet every need and contingency.

USS Vertagreen products contain those extra pluses that separate them from ordinary turf fertilizers—like urea-formaldehyde

for sustained, long-term nitrogen release. There's potassium sulfate to provide needed sulfur for lush growth and a dark healthy color. And iron is available in chelated and fritted form. Add a complete guarantee of secondary and micro-nutrients and you have turf products that are second to none.

And backing this line of Vertagreen products are the best turf

teams in the business—your local Vertagreen distributor and a Vertagreen turf specialist. The two work together to help plan your tailor-made turf program and keep it running smoothly. And that makes it easy for you because when you want the best you just have to see the best—and that's your local Vertagreen distributor.

A product for all reasons.

THE HISTORY OF A LIE

First somebody told it,
Then the room wouldn't hold it,
So the busy tongues rolled it
Till they got it outside:
Then the crowd came across it,
And never once lost it,
But tossed it and tossed it,
Till it grew long and wide.
This lie brought forth others,
Evil sisters and brothers,
A terrible crew,
As headlong they hurried,
The people they flurried
And troubled and worried,
As lies always do.
So, evil-boded,
This monstrous lie goaded,
Till at last it exploded,
In sin and shame.
But from mud and from mire
The pieces flew higher,
Till they hit the sad liar,
And killed his good name.

— Reader of Ann In The Monett Times.

PRE-CONFERENCE REVIEW

It appears that not even the E.P.A. can motivate individuals towards the ever increasing knowledge needed for competence and advancement in such a demanding profession as ours.

Perhaps many Superintendents cannot be humble enough to admit that they might be at least a little "fuzzy" in one area or another. I can't help but associate this with a cartoon, posted on a bulletin board near the Dean's Office at a major university. It pictured two students who had recently graduated. As they were pondering over all the subject matter both had mastered, one said to the other, "You know, I am still a trifle foggy in 'one' area". Hopefully, most Superintendents don't fall into this category.

The results of several tests administered during the Seminars, undoubtedly indicate that we are not as educated as we would like our committee's to believe—perhaps, more than a trifle foggy!

Of course, it would be unwise to completely blame low attendance and poor attitude on our membership, when many managers, club presidents, green chairmen, etc., haven't the foggiest notion what certification even details. If these programs are to gain the recognition they deserve, a significant and complimentary action by the association is necessary to aid Superintendents in promoting these objectives. Perhaps we have done more harm than good, by inaccurately explaining for one reason or another, the positive aspects of certification, without adequate support and promotion from Kansas. Motivation is certainly lacking, and what better place to light the fire than at your own Club. A little effective communication should do wonders for all concerned, especially if your Green Chairman has the match.

It becomes quite clear that a parallel exists between what occurred in San Antonio and the old saying, "You can lead a horse to water, but you can't make him drink".

**Clyde Hamilton, Supt.
Knollwood Club - Lake Forest, IL 60045**

Two million woodland acres in the Northeastern States were denuded by Gypsy Moth caterpillars this season. That's twice the acreage defoliated in 1970, and more than six times the 1969 acreage. On approximately 25 percent of the two million acres, trees were stripped of from 70 to 100 percent of their leaves.

The U.S. Department of Agriculture has designed a comprehensive 5-year research and development program in an attempt to bring the destructive Gypsy Moth under control. The program will make use of both biological and chemical controls, capitalizing on the best features of each while avoiding possible environmental hazards.

The United States Department of Agriculture reports that insect pests, unless stopped by pesticides, cause a 25 to 30% decrease in the annual production of fruit and vegetables. This figure becomes even more serious when combined with facts given by the Food and Agriculture Organization of the United Nations. FAO found the 1969 world food production showed no increase over that of 1968 -- even though the population grew. Without the use of pesticides, there will not be enough food to feed the world.

THE COMPUTER

...is a great invention. There are just as many mistakes as ever, but now they are nobody's fault.

EXEMPTIONS TO THE FAIR LABOR STANDARDS ACT AMENDMENTS

If the new amendments to the Fair Labor Standards Act left your budget short of funds for the coming fiscal year, the following exemptions may offer you relief.

The schedule for new minimum wage rates are: (a) beginning 1 May, 1974, \$1.90; (b) 1 January, 1975, \$2.00; (c) 1 January, 1976, \$2.20; and, (d) 1 January, 1977, \$2.30.

- **State and local government agencies which operate seasonal amusement or recreational establishments [such as golf courses, swimming pools and summer camps] may utilize an exemption to the law provided in Section 13 [a] [3] of the Act.** The exemption is clearly provided to public as well as private seasonal recreational facilities. It provides a **complete exemption from both minimum wage and overtime** for employees of an amusement or recreational establishment which meets either one of the following two criteria: (a) is not open for more than 7 months in a year, or, (b) whose average receipts during any 6 months of the preceding calendar year (not necessarily consecutive 6 months) did not exceed one-third of its receipts for the other 6 months.

Year-round department or agency employees who are employed exclusively in the seasonal recreational facility during its period of operation are exempt. However, year-round department or agency employees, working out of the central or regional office or other non-seasonal facilities, spending a part of their work day in a place other than the exempt facility (i.e., maintenance crews or playground coordinators) are not exempt from coverage of the Act.

- An exemption from minimum wage and overtime pay requirements is provided for any employee employed in a bona fide executive, administrative or professional capacity. An employee will qualify for exemption if all the pertinent tests relating to **duties, responsibilities and salary** as stipulated in the Wage and Hour Division's regulations are met. Any employee who is paid at least the minimum weekly salary specified and who also meets all of the duties and responsibilities specified is exempt from minimum wage and overtime pay requirements of the law. An honorific title does **not** make an employee exempt. An employee is not exempt because he has a college degree and is considered a "professional" within his field. This exemption is discussed in "W.H. Publication 1838 (Rev)".

- The minimum wage and overtime requirements do not apply to park and recreation students who are employed in park and recreation agencies primarily to fulfill academic requirements. Where a program is designed to provide a student with professional practice in the furtherance of his college education, and where the training is **predominantly for the benefit of the student**, the Wage and Hour Division does not consider the student an employee of the agency to which he is assigned.

Tim Miles

A LITTLE KNOWN FACT

There are approximately 81 million people who are on government payrolls in one way or another—employment, unemployment, welfare, etc. Yet there are only about 71 million people working in the private enterprise system to earn money to pay taxes from which the 81 million are paid.

WIPE OUT WEEDS

with Banvel® 4S & Banvel®+2, 4D

HERBICIDES

The broadleaf weed 'specialists' designed for professional turf programs.

Here's why BANVEL® herbicides are the professionals' choice for weed control:

- Used as directed Banvel will not harm trees, ornamentals or turf—it just eliminates weeds.
- No season restrictions. Lay down Banvel from early spring to late fall—all through the growing season.
- Rain will not affect Banvel. It keeps on working because it translocates—penetrates leaves and is absorbed through roots to attack every part of the weed.
- No special spraying equipment necessary. It is easy to clean out of equipment after use.
- Mixes readily with hard or soft water.
- Easily stored through winter months without losing potency.

Banvel herbicides—products for professional turf men
