

62 OF THE NATION'S TOP 100 GOLF COURSES RELY ON TORO IRRIGATION

It's no coincidence that 62 of America's 100 Greatest Golf Courses (as ranked by Golf Digest Magazine) all use Toro Irrigation Systems. After all, they choose Toro for a number of very good reasons.

Automatic controller precision meters water

With the benefits of modern technology, flexible solid state Toro controllers can provide just the right precipitation rate to insure ideal growth for turf of any

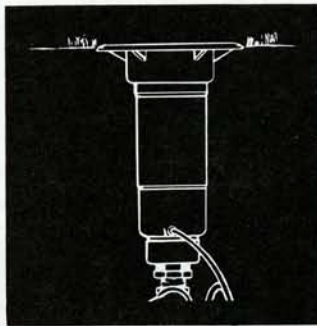

IRRIGATION DIVISION

magnitude without expensive waste of water.

Automatic sprinkler heads. The strong silent type

Toro Sprinkler Heads are made of tough cyclocac® plastic. Gear driven to insure

consistent rotation. Toro's exclusive valve-in-head feature prevents low head drainage and valve is serviceable without digging.

Toro offers over 700 different sprinkler models for every imaginable application... and they all share the kind of quality that only comes with innovative design, practical engineering and sturdy construction.

Toro heads feature a stainless steel spring for positive pop-down...

protecting heads from vandalism and mower damage.

More than 50 years of expertise

More than 50 years of expertise—Toro's learned a lot about total turf care in 50 years. And all that experience is available to you whenever you need it.

If you haven't seen a total Toro golf course irrigation system lately, let us tell you more.
