

# Now, golfers will have only their putters to blame.

***With the Greensmaster 300, it won't be the green's fault.***

They can blame the ball.  
They can blame the putter.  
They can blame the weather or perhaps their lack of concentration.

But when you cut with the Toro Greensmaster\*300, they can't blame the green.

That's because the versatile Greensmaster 300 gives you the lowest possible precision cut of any greens-mower on the market.

*Any greens-mower. (So reason suggests if you're not currently using a Toro, you may be riding an easy target for a lot of bad putting excuses.)*

5 BLADE

8 BLADE

And now recent design changes and a new line of accessories enable you to custom tailor the Greensmaster 300 to your specific maintenance practices and turf conditions.

To assure an accurate clip, an optional variable speed kit allows you to select a constant ground speed from 0 to 3.5 mph. For a finer clip at low heights of cut, or for easy maneuvering in tight spots, simply adjust the speed downward. Precision cutting on greens, tees, approaches and other formal areas is assured with the new 5 and 8 blade cutting units, each available with our exclusive single-

knob adjustment for maintaining a sharp cutting surface with a minimum of effort.

Just a twist of your hand is all it takes. And it virtually eliminates the need for backlapping.

We added new, heavier Wiehle rollers for greater penetration to maintain an even cut, even over your denser grasses.

Even at cuts below 1/8", the Greensmaster 300 delivers a consistent, precise cut due to a new low-cut suspension frame engineered to transfer additional downward pressure to the front roller.

An extra-thin tournament bed-knife is available for precision cuts down to 3/32".

When you feel that backlapping is necessary, an optional kit is available for maintaining the leading edges of bedknives and reels at their sharpest levels.

Plus many more options are available to achieve and maintain that cut, including spikers, thatchers, combs, brushes, a full line of rollers, and a new cam quick height-of-cut kit.

Then add those improvements and accessories to a machine that's already the most popular riding greensmower on the world's finest courses.

It may not put an end to your members' errant putts, but it will challenge some of them to come up with a better excuse.

## TORO

**The professionals that keep you cutting.**
