LEBANON

Dear Members of the Midwest Regional Turf Foundation and Friends:

Dr. Marvin W. Phillips, Head of the Department of Agronomy, Purdue University, announced that Dr. Clark Throssell has accepted the position of Assistant Professor of Agronomy in Turfgrass Science. Dr. Throssell is a recent graduate from Kansas State University and will join the Purdue faculty in August 1985.

I am very excited about the Search Committee's selection for several reasons. Dr. Throssell's teaching and academic skills will uphold the high degree of scholastic standards for turfgrass education at Purdue. He is research oriented and his Ph.D area of interest was in infrared thermometry irrigation scheduling and drought stress on cool season grasses. This will be of utmost importance in the years to come. During pursuit of his Master's degree from Penn. State, Clark's thesis involved Management Factors Affecting Putting Green Speed.

He has the ability to communicate and has a broad based interest in many facets of turf managements. Clark is a skillful speaker and teacher, and because of the range of his background and experience can relate to our needs, whether in the area of lawn maintenance, commercial care, athletic fields, commercial growers or golf courses. Clark has the interest and experience and has been in the trenches. We are most fortunate to have such a fine young man accept this position.

On behalf of the Board of Directors of MRTF I ask for your continued support in the search for excellence in turfgrass knowledge.

**Steve Frazier, President
Midwest Regional Turf Foundation**
