

It's easy to get swept up with Jacobsen.

Large-scale clean-up and turf maintenance is now easier than ever with Jacobsen. We offer three pull-behind sweepers with a wide 5 foot swath and 5 cubic yard capacity to tackle your most demanding jobs.

All three feature the Jacobsen-designed rubber finger pick-up system. Gentle to turf, these fingers pick up leaves, branches, twigs, clippings, bottles, paper, pine needles and other wet debris. They also break up aeration cores and sweep up residual grass tufts.

Model 720 mounts on tractors with a category 1, 3 point hitch and 540 PTO drive system. Model 720E is equipped with a 14 HP engine and universal hitch. Model 720E-HL hooks up to any vehicle with a drop-pin coupler and lifts up

to 9 feet for easy dumping into trucks.

Jacobsen makes a complete line of turf maintenance equipment, including a self-propelled sweeper and a high volume blower to handle your biggest jobs.

Only the Jacobsen seeder has a seed roll to precisely meter seed at the desired rate. The seed is dropped into a pre-cut slit in the soil, for three times better germination rates than broadcast methods. Other seeders can't control seeding rates as effectively—and that's important with today's expensive seed costs.

For a complete list of top quality equipment, contact your Jacobsen distributor. Attractive lease and finance plans available.
