

**par ex**  
The Ex Stands For Excellence

# Why the EX STANDS FOR EXCELLENCE in professional turf care.

Par Ex is the only professional fertilizer line containing IBDU, undisputedly the finest slow release Nitrogen source in the world.

IBDU gives you the highest level of WIN, or Water Insoluble Nitrogen.

IBDU delivers all of its Nitrogen in a single growing season.

The Nitrogen release rate of IBDU is generally affected by only two factors: soil moisture and granule size.

Slower release makes Par Ex products perfect for your Fall Fertilization program.

Fewer applications are required, labor costs are cut.

The salt index of IBDU is the lowest of all commonly used fertilizer materials.

IBDU fights nitrate pollution because very little Nitrogen is lost through leaching or volatilization.

Choose from over 60 different product formulations.

## Hazardous Chemical Storage Buildings

**Rely on Safety Storage Relocatable Weatherproof Buildings for Safe Containment of Golf Course Chemicals.**

Now you can remove hazards from your chemical storage areas. Provide secondary containment and institute real fire-protection and security measures. Safeguard your facility. Minimize liability. And comply with federal, state and local regulations.

Proven throughout the country—in all climates and virtually every hazardous chemical—all Safety Storage Buildings incorporate secondary containment reservoirs, corrosion-resistant floor gratings, ground connections, fire-suppression systems, special security features, and hazard labeling. Select from an array of options ranging from emergency eye/face wash units, forced air ventilation, explosion-proof lighting, built-in heating and cooling, to multiple fire-wall-separated compartments.

These durable, all-weather, welded steel and fire-rated buildings are available with a host of options to meet most storage requirements.

# They're known by the greens they keep.

Lush, beautiful greens and tee boxes are well-known to superintendents who use Ringer Greens Products. With five finely-granulated formulations available, you can match our fertilizer to your needs throughout the seasons. Each formulation releases the precise amount of nitrogen needed to eliminate burning and green-up greens evenly. The remaining nitrogen is reserved for slower release to encourage consistent growth. Try Ringer Greens Products. Your greens will be in good company.

# RINGER®

Contact your local distributor or Ringer's Golf & Commercial Turf Division at 9959 Valley View Road, Minneapolis, MN 55344, (612) 941-4180. Ringer offers a complete line of fertilizers for greens, fairways and general turf applications.

## **The Ohio State University Golf Course Maintenance Short Course**

The eighth annual OSU Golf Course Maintenance Short Course will be conducted January 17-21, 1994 at the Holiday Inn on the Lane in Columbus, Ohio. This short course will provide current and valuable information on golf course turfgrass maintenance. Emphasis will be placed on principles of soils and fertility, weed control, entomology, plant pathology, and golf course design for tournaments. The short course is designed for all golf course personnel including golf course employees, foremen, and superintendents seeking a more formalized training in turfgrass maintenance. Attendants will qualify for recertification credits from the Ohio Department of Agriculture for Licensed Pesticide Applicators. Certified Golf Course Superintendents will qualify for continuing education units from the GCSAA.

The registration fee is \$350.00. The deadline to register is December 27, 1993, or until 60 applications are received. Lodging facilities are available at the Holiday Inn on the Lane, or other local hotels. For more information, please contact Barbara Bloetscher at (614) 292-7457 for short course content, or the Department of Conferences and Institutes at (614) 292-4230 for course registration.

# WASHED TURF?

Yes, **washed Penncross creeping bent** and "**Executive Blend**" **bluegrass sod** has arrived in the Midwest! This new innovation offers many benefits:

- Eliminates traditional interface problems between sod and the existing soil.
- Washed sod consistently roots down more rapidly than conventional sod (typically 3½" of root growth in just 8 days).
- Will quickly establish into all soil types.
- Lower weight allows for shipping up to 50% more per load
