

# ON TARGET A.D.C.

## TAKE CONTROL OF YOUR TURF !

- ◆ Are grubbing skunks causing thousands of dollars worth of damage to your course?
  - ◆ Are beavers having a field day with your freshly planted trees?
  - ◆ We specialize in removing targeted species only! No Non-Target catches.
  - ◆ Our goal is to protect your course from animal damage, satisfaction guaranteed!!!
  - ◆ Our business is owned and operated by a certified state trapping instructor with over 25 years of experience.
  - ◆ We will provide a sensible, in detail wildlife management plan to suit your needs for the future and eliminate your current problems quickly.
  - ◆ Minimal use of traps to insure safety to your golfers.
- We take as much pride in our work as you do in your course.

### On Target Animal Damage Control

Specializes in the selective control of grubbing skunks. Muskrats caveing in banks on ponds. Groundhogs and beaver removal. Our control methods have proven to be 100% effective in major golf courses in the Chicago area.

# MILLCREEK TOP DRESSERS

**An Easy Way to Dispose  
of Grass Clippings...  
And Save Money**

In one easy step, eliminate costly dumping fees and improve the rough by spreading grass clippings still enriched with precious fertilizer. Millcreek's Top Dressers are equipped with an adjustable undershot poly brush designed to evenly distribute top dressing from three to ten feet wide.

The spreading uses of these Top Dressers are endless:

- Fertilizer
- Sand
- Top Dressing
- Grass Clippings
- Seed
- Compost

Models are available with PTO or Engine Drive.

# Greensmix™ Pulls The Plug On The Myth That All Topdressing Sands Are Created Equal.

Don't be fooled by thinking that all topdressing sands are created equal. They're not...not by a long shot. Non-dried sands may contain up to 8% water. **Greensmix™ Kiln-Dried Topdressing Sand** is dry sand. That means you can use it immediately. And it's sterilized, so there's never anything growing in it. We also pre-test Greensmix™ Kiln-Dried Topdressing Sand to ensure consistent gradation with each load. We'll even include sand analysis test results with your order. Don't get stuck with some watered-down topdressing sand. Use the best. **Greensmix™ Kiln-Dried Topdressing Sand.**

# USE NATIVE GRASSES & WILD FLOWERS

You and the environment  
will reap the benefits:

- Less water use
- Less pesticide use
- Less maintenance
- Establish habitats for small wildlife and birds
- Meet the criteria for participation in the Audubon Cooperative Sanctuary Program
- Add to the beauty and diversity of the golf course

To learn all about the selection, establishment and maintenance of these "naturals," talk to the long-time experts at Lofts.
