

WATER RESISTANT

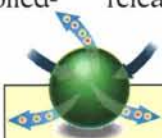

WATER RESISTANT

Pursell's POLYON® fertilizers are the only controlled-release fertilizers that aren't affected by soil moisture. So they virtually eliminate surge growth and excessive clippings.

While other fertilizers release too fast due to excessive rain, soil pH and microorganisms, the patented POLYON coating resists them. POLYON fertilizers

release nutrients to your turf as needed in small daily doses. Giving you greener turf for a longer time.

100% polymer coating gradually releases nutrients for consistent daily feeding, rain or shine.

While you can't always count on the weather, you can count on POLYON fertilizers. Call
