

WATER RESISTANT

WATER RESISTANT

Pursell's POLYON® Technology is the only controlled-release fertilizer that isn't affected by excessive rainfall. So it virtually eliminates surge growth and excessive clippings.

While other fertilizers release too fast due to excessive rain, soil pH and microorganisms,

POLYON's patented coating resists them. So POLYON

releases nutrients to your turf as needed in small daily doses. Giving you greener turf for a longer time.

While you can't always count on the weather, you can count on POLYON. Call 1 800 422-4248 today.

100% polymer coating gradually releases nutrients for consistent daily feeding, rain or shine.
