

The John Deere RZI 700 features a high-pressure, 75-gallon system that injects liquids directly to the root zone of the soil.

WE PUMPED UP THE PRESSURE ON PESTS.

THE JOHN DEERE **RZI 700.**

Effective. Efficient. Environmentally friendly. You pick the description. The John Deere RZI 700 fits them all. Now, you have an alternative to traditional methods. You can inject liquids directly to the root zone, eliminating drift and minimizing surface toxicity.

The RZI 700 delivers treatments up to six inches deep through 16 single- or multi-orifice nozzles. The 5,000-psi system ensures injections penetrate

even hard-packed soil. And, at 3 mph working speed and 3 x 3-inch spacing the RZI 700 covers a lot of ground at 64,800 square feet per hour.

It all adds up to bad news for pests like white grubs and mole crickets.

In fact, tests show that a high percentage of grubs are killed from the force of injecting water alone. Hard to get more environmentally friendly than that.
