

The Unbeatable Combination™

PanaSeá Plus™

and

SeaSequential™

SeaSequential™ Liquid Chelated Iron and Micronutrient Complex

PanaSeá Plus Liquefied Sea Plant Extract consistently outperforms competing products because it has 2 1/2 - 8 times higher hormone levels and an enormous range of micronutrients and trace elements. That's why turf professionals who manage under high stress conditions apply PanaSeá Plus to produce:

- Deeper roots and more root volume — 20-40% more than fertilizers alone
- Better quality and density
- Superior stress tolerance
- Delayed senescence
- Accelerated seed germination and early establishment

SeaSequential Liquid Chelated Iron Supplement and SeaSequential Micronutrient Complex are premium products designed to produce sustained color and vigor in your turf. Here are some of their unique features and benefits:

- Exclusive Multiple Iron Chelate Formula
- Natural sugars incorporated into each formulation to promote microbial activity
- Micronutrients with lipid soluble properties to accelerate leaf surface penetration
- Enhanced chlorophyll synthesis, enhanced nutrient delivery and promotion of soil nutrients uptake
