

WE PUNCHED HOLES IN THE THEORY THAT QUALITY AND QUANTITY DON'T MIX

The John Deere Aercore® 800.

The walk-behind Aercore 800 delivers the same advantages found in the tractor-mounted Aercore 1000 and 1500. Specifically, the ability to deliver high productivity without sacrificing hole quality, durability, or ease of service.

Powered by an 18-hp Kohler engine, the 800 covers a lot of ground at a coring swath of 31.5-inches. Four gears allow you to match productivity and speed.

Like the 1000 and 1500, the "flexi-link" mounting design of the 800 helps ensure the tines stay perpendicular to the ground longer for a cleaner hole. In addition, belt drive

instead of chains makes it quieter, more forgiving, and easier to maintain.

Tine choices include solid and open-side design that combine with the four working speeds to deliver from 1.4" x 1.4" to 2" x 2.9" hole patterns at up to 3.5-inch depths. Talk with us soon for a firsthand look.

www.deere.com

Powered by an 18-hp Kohler engine, the Aercore 800 can punch up to 571,725 holes an hour at a coring swath of 31.5 inches

(continued from page 30)

A big, hearty congratulations to Rick Becker, assistant superintendent at Wilmette G.C., for taking first prize in the 18-Hole Challenge at the GCSAA Convention in Orlando. Rick is now the proud owner of a Ranger Sport R61 boat (which would have been useful at Mill Creek).

.....
Congratulations to the Steve Schendel family on the birth of their second daughter, Emma, on February 27, just two weeks after Steve took over as new superintendent at Highland Park C.C. Steve was most recently assistant superintendent at Butterfield C.C.

.....
Nice to see several of our members in print recently. Dave Ward of Olympia Fields C.C. was quoted in a *Chicago Sun-Times* article on renovations being done in preparation for the 2003 U.S. Open, while Bob Maibusch of Hinsdale G.C. has a letter printed in the April issue of the second-most anticipated publication we receive (after *On Course*, of course): *Golfdom*. Last but not least, Al Fierst of Oak Park C.C. responded to the most dangerous golfer known to superintendents (NOT Gerald Ford with a gallery)—the uninformed golfer with a nationally syndicated radio show—in a recent publication. It seems this local person feels that men playing golf, especially in the early morning, may lose interest in sex due to the pesticides applied on golf courses. Perhaps a case study should be performed to test the merits of this claim...

.....
Reminder #2: Please turn off your cell phones/pagers at MAGCS meetings—our education presenters deserve our full attention without the distractions.

Our Annual March Gin Charity Tournament

Sad to say, what was once a well-attended, fun tournament to benefit people in need has dwindled down to about a dozen loyal individuals. Unless we manage to get more people involved, this will be the last year for a charity event that has provided underprivileged children with more than \$20,000 over the past nine or ten years.

I realize it's hard to think about gin when the temperature outside is above 70° and there is a ton of work to do on our golf courses. Truthfully, March probably is not a good month for most of us. I realize also that the committee has to spend more time calling our Midwest friends to remind

them to come out, or at least send a check. In our Midwest circle, we have the most generous human beings in the world when it comes to needy, sick, helpless little children. So let me hear from you, along with a check made out for \$40 to the Maryville Academy. Please! You will sleep better.

The March Charity Gin Tournament was once again won by brother Peter (his fourth championship in ten years). Peter beat me in the finals after I made a lucky challenge. Congratulations, brother Peter.

Submitted respectfully
by Paul N. Voykin

The Masters: Go There, Do That

(continued from page 18)

seven-birdie string to climb on the leader board on Saturday. Brett and I pirated chairs at Amen Corner and skipped along all the way to his string-ending par on 14. I swear he missed that putt because he saw us at the ropes on 14 and thought we were stalking him.

Sadly, the trip home was a nightmare, but we did get back in time to see the final round on TV.

The following night I had—you guessed it—a green committee meeting. The first thing on the agenda was stimping the green with the hydraulic oil leak among all the ball marks where the mysterious turf disease was being spread by the geese. Oh no! Here we go again.

The Perfect Fit.

HERITAGE® and DACONIL®. The Fungicides That Fit Your Disease Management Program Perfectly.

Most all golf course superintendents puzzle over the right combination of disease control products for their turfgrass management program. Put an end to this dilemma with HERITAGE and DACONIL, the two broad-spectrum fungicides that fit your program perfectly. Together, HERITAGE and DACONIL bring just the right complement of advantages to your tees, greens, and fairways.

HERITAGE FUNGICIDE

- Exhibits both preventative and curative activity
- Only strobilurin chemistry with systemic activity
- Controls most turfgrass diseases, including Pythium, take-all patch, summer patch, anthracnose, and snow mold
- Reduced risk to environmental resources
- Extended spray intervals with low use rates
- Improves turf quality with no stunting or growth regulator effect

DACONIL FUNGICIDE

- Multi-site mode of action
- Sticks and stays for maximum protection against fungal diseases
- Controls 14 diseases, including dollar spot, leaf spot, melting out, rust, and red thread
- Three flexible formulations—Ultrex®, Weather Stik®, and Zn

When putting your turfgrass disease management program together, pick up HERITAGE and DACONIL fungicides—they're the perfect fit.

RapidTurf®

NATURAL GRASS GROWN ON PLASTIC

Exclusively Grown in Illinois By

CENTRAL

Sod Farms, Inc.

1-800-310-0402

What do a superintendents think
about **RapidTurf** ?

"We've used RediPlay/RapidTurf on four different courses. Sodding 19 greens over a 2½ week period. Each of these greens was playable inside of two weeks. RediPlay/RapidTurf does not float like washed sod. And since there's no damage in cutting, it roots faster after installation. I highly recommend it!"

Tom Jauch

Vice-President GolfVision LLC

"It roots faster than any grass I've seen before. In fact, it began rooting withing two days of installation. We opened in half the normal time. It's great stuff!"

Lawrence Flament,
Stonewall Orchard Golf Club

Delivered throughout the Midwest by refrigerated truck

Illinois
TURFGRASS FOUNDATION

Sunset Ridge Plan

Is the title given to a golf club - golf business donation program that is financially supportive of world class turfgrass research and education. Your contribution will ensure research that is specific to Illinois, performed in conjunction with Illinois research scientists that will provide Illinois superintendents with the information they need to continue to provide the highest level of turfgrass quality.

This rich tradition was created in 1992 through the extreme generosity of the membership of the Sunset Ridge Country Club, Northfield, IL. They truly appreciate the established reputation their golf course has for constant outstanding conditions and wish to keep this level of quality forever. Sunset Ridge C.C. has set the stage for others to follow, and follow they will because Illinois is home to the finest turfgrass facilities to be found in our nation. In conjunction with the new Midwest Golf House a world class turfgrass research facility will provide information that is specific to Illinois conditions. Our own university research scientists can concentrate on evaluations under the conditions found in Chicago and other Illinois areas.

The Illinois Turfgrass Foundation and Chicago District Golf Association are reinvigorating their efforts to develop the financial support necessary to have a world class turfgrass research and educational program. Through an ever evolving commitment to the future of turfgrass and the environment, we seek to enhance every individual's life by supporting efforts to improve the quality of open space whether it be landscape, parks, athletic fields, golf courses or right of ways.

To find out how you can benefit from joining this distinguished club please contact ITF headquarters at (312) 201-0101 or (708) 456-8547.

COMPOST

Compost provides essential micronutrients to make turf and ornamentals grow faster and healthier. Compost's ability to retain moisture reduces drought shock. Its microbial content improves soil texture for better air and water circulation and reduced compaction. After fertilizer applications, compost retains added nutrients and makes them plant-available as needed — allowing reduced application rates.

- Divot repair mixes
- Top dressing high traffic areas — fairways, rough, practice areas
- Preparing beds for ornamental plants
- Preparing soil for new seed or sod
- Backfilling when transplanting
