the Bull Sheet

(continued from page 28)

omnibus spending bill passed by Congress in October, which President Clinton was not willing to veto. This measure pushed back by four years the 2001 phase-out date for the agricultural fumigant. The new deadline matches the phase-out for other developed nations and allows more time for scientists to develop effective and economically viable alternatives.

.....

- Supplier and installer of quality large caliper Shade, Ornamental and Evergreen trees.

chipco®

PROXY

GROWTH REGULATOR

New Plant Growth Regulator

What if one product could help save time, money, extend equipment life and improve course playability, while regulating turf growth? New CHIPCO® PROXY™ brand plant growth regulator (PGR) does all that and more.

A single application of CHIPCO® PROXY™ on cool-season grasses can provide up to 50 percent clipping weight reduction over a seven-week period. With turf growth and mowing frequency sharing a direct relationship, turf industry professionals who apply CHIPCO® PROXY™ will notice and appreciate a reduction in mowing.

Table A
% Clipping Weight Reduction Compared to Check

Residual Performance

Kentucky Bluegrass	7 weeks
Perennial Ryegrass	7 weeks
Tall/Fine Fescue	4 weeks
Bentgrass	4 weeks

COMPOST

Compost provides essential micronutrients to make turf and ornamentals grow faster and healthier. Composts ability to retain moisture reduces drought shock. Its microbial content improves soil texture for better air and water circulation and reduced compaction. After fertilizer applications, compost retains added nutrients and makes them plant-available as needed — allowing reduced application rates.

- Divot repair mixes
- Top dressing high traffic areas — fairways , rough, practice areas
- Preparing beds for ornamental plants
- Preparing soil for new seed or sod
- Backfilling when transplanting
