

The John Deere RZI 700 features a high-pressure, 75-gallon system that injects liquids directly to the root zone of the soil.

WE PUMPED UP THE PRESSURE ON PESTS.

THE JOHN DEERE **RZI 700.**

Effective. Efficient. Environmentally friendly. You pick the description. The John Deere RZI 700 fits them all. Now, you have an alternative to traditional methods. You can inject liquids directly to the root zone, eliminating drift and minimizing surface toxicity.

The RZI 700 delivers treatments up to six inches deep through 16 single- or multi-orifice nozzles. The 5,000-psi system ensures injections penetrate

even hard-packed soil. And, at 3 mph working speed and 3 x 3-inch spacing the RZI 700 covers a lot of ground at 64,800 square feet per hour.

It all adds up to bad news for pests like white grubs and mole crickets.

In fact, tests show that a high percentage of grubs are killed from the force of injecting water alone. Hard to get more environmentally friendly than that.

the Bull Sheet

(continued from page 30)

Apply by sending resume or application to: Milwaukee Country Club, 8010 N. Range Line Road, River Hills, WI 53217. Phone 414-362-5222.

Summer turf intern wanted: Aurora C.C. is seeking a current turf student for the 1999 golf season. Successful applicant should have some golf course experience, with desire to excel in the industry a MUST. Huge salary, benefits too numerous to mention. Send resume to John Gurke, c/o Aurora Country Club, P.O. Box 278, Aurora, IL 60507 or call 630-892-3600.

Don't forget: The MAGCS Web site at www.magcs.org is up and running. This address now always appears on the index page of *On Course*.

Congratulations to Russell Stachlewitz, who has accepted the superintendent's position at Prestbury G.C. in Sugar Grove, IL. Russ is formerly of Lochmoor Club in Grosse Pointe Woods, MI, where he was assistant superintendent. Russ will be working with one of our very own, Dave Meyer.

Tod Hopphan of Elgin C.C. has recently completed the Integrated Pest Management (IPM) specialization in GCSAA's Environmental Management Program (EMP). IPM is one of six distinct areas of specialization in the program, along with Water Quality and Application; Underground Storage Tanks; Employee Safety and Right-to-Know; Golf Course Development; and Storage, Disposal and Recycling. Congratulations, Tod, for the several recent feathers in your cap.

HEY! Just two more months to submit entries for the Ray Gerber Editorial Award. This is where I do my best Fred Opperman impression and say, "C'mon, guys, let's write those articles!"

Horticultural supervisor needed. Full-time position with excellent benefits. Call Rick Hahn, Marriott's Lincolnshire Resort, at 847-634-0100, ext. 6275.

Congratulations to Luke Cella on accepting the graduate assistant's position in environmental sciences and natural resources at the University of Illinois at Urbana-Champaign. Luke will work under Dr. Tom Voigt beginning in May. Don't forget us poor working stiffs up here, Luke, and good luck!

For sale: Smithco 6915, 125-gallon boom sprayer with MTD-3000 controller plus foam marker. Very good condition, used three seasons. Call Jeff at Chalet Hills GC at 847-639-9091.

The sympathy of the Midwest Association of Golf Course Superintendents is extended to the Don Gerber family on the death of Don's mother, Mrs. Jo (Ray) Gerber on Monday, April 5. Mrs. Gerber was 94 years old. She served as one of the hostesses for the women's program in 1959 (Ray was president of MAGCS) when the GCSAA conference was held in Chicago at the Sherman Hotel. She was the wife of a greenkeeper when roughts were mowed with horses and lime was used to control diseases. Her era saw the mechanization of the golf courses and the first chemicals used to control weeds and disease.

Midwest Association Notes

(continued from page 26)

and since the first of the year 60 members have been elected to membership or have been reinstated to active membership. Using this increase as a gauge, by the end of this year membership in the National Association should be stronger than ever before.

At the Friday morning Membership Meeting, the Membership voted to increase the dues to \$10 yearly retroactive January 1, 1937. All membership cards issued for 1937 at the old rate have been declared null and void. The purpose underlying the raise in dues is to increase the scope and value of the organized greenkeeping movement.

At the same meeting, the Membership voted to change the name of the organization to "The American Greenkeepers Society." The change in title will not become effective perhaps until the first of 1938.

The Perfect Fit.

HERITAGE® and DACONIL®. The Fungicides That Fit Your Disease Management Program Perfectly.

Most all golf course superintendents puzzle over the right combination of disease control products for their turfgrass management program. Put an end to this dilemma with HERITAGE and DACONIL, the two broad-spectrum fungicides that fit your program perfectly. Together, HERITAGE and DACONIL bring just the right complement of advantages to your tees, greens, and fairways.

HERITAGE FUNGICIDE

- Exhibits both preventative and curative activity
- Only strobilurin chemistry with systemic activity
- Controls most turfgrass diseases, including Pythium, take-all patch, summer patch, anthracnose, and snow mold
- Reduced risk to environmental resources
- Extended spray intervals with low use rates
- Improves turf quality with no stunting or growth regulator effect

DACONIL FUNGICIDE

- Multi-site mode of action
- Sticks and stays for maximum protection against fungal diseases
- Controls 14 diseases, including dollar spot, leaf spot, melting out, rust, and red thread
- Three flexible formulations—Ultrex®, Weather Stik®, and Zn

When putting your turfgrass disease management program together, pick up HERITAGE and DACONIL fungicides—they're the perfect fit.

Illinois
TURFGRASS FOUNDATION

Sunset Ridge Plan

Is the title given to a golf club - golf business donation program that is financially supportive of world class turfgrass research and education. Your contribution will ensure research that is specific to Illinois, performed in conjunction with Illinois research scientists that will provide Illinois superintendents with the information they need to continue to provide the highest level of turfgrass quality.

This rich tradition was created in 1992 through the extreme generosity of the membership of the Sunset Ridge Country Club, Northfield, IL. They truly appreciate the established reputation their golf course has for constant outstanding conditions and wish to keep this level of quality forever. Sunset Ridge C.C. has set the stage for others to follow, and follow they will because Illinois is home to the finest turfgrass facilities to be found in our nation. In conjunction with the new Midwest Golf House a world class turfgrass research facility will provide information that is specific to Illinois conditions. Our own university research scientists can concentrate on evaluations under the conditions found in Chicago and other Illinois areas.

The Illinois Turfgrass Foundation and Chicago District Golf Association are reinvigorating their efforts to develop the financial support necessary to have a world class turfgrass research and educational program. Through an ever evolving commitment to the future of turfgrass and the environment, we seek to enhance every individual's life by supporting efforts to improve the quality of open space whether it be landscape, parks, athletic fields, golf courses or right of ways.

To find out how you can benefit from joining this distinguished club please contact ITF headquarters at (312) 201-0101 or (708) 456-8547.

COMPOST

Compost provides essential micronutrients to make turf and ornamentals grow faster and healthier. Composts ability to retain moisture reduces drought shock. Its microbial content improves soil texture for better air and water circulation and reduced compaction. After fertilizer applications, compost retains added nutrients and makes them plant-available as needed — allowing reduced application rates.

- Divot repair mixes
- Top dressing high traffic areas — fairways , rough, practice areas
- Preparing beds for ornamental plants
- Preparing soil for new seed or sod
- Backfilling when transplanting
