

The "More" machine

GREENS KING™ VI

More Productivity, More Reliability

It's the most versatile, most reliable, most user-friendly triplex greens mower available. Whether you're maintaining greens, tees, approaches or sports fields, the Jacobsen Greens King VI delivers results that meet your high expectations. Jacobsen has always offered the finest cut available from a triplex mower.

The Greens King VI continues that strong heritage.

The fully floating, steerable reels help prevent marking and scuffing during turns. Choose 11-blade or 7-blade reels for a high-quality finish on a variety of turf conditions.

More Power Where You Need It

Choose the liquid-cooled, fuel-efficient 19-horsepower Kubota diesel or the high-output 18-horsepower Briggs & Stratton Vanguard™ gas engine. The Greens King VI has a recommended top mowing speed of 3.7 mph for outstanding productivity.

31 FROM THE GCSAA

32 THE WAY WE WERE

The Midwest Association of Golf Course Superintendents (MAGCS), founded December 24, 1926, is a professional organization whose goals include preservation and dissemination of scientific and practical knowledge pertaining to golf turf maintenance.

We endeavor to increase efficiency and economic performance while improving and enhancing the individual and collective prestige of the members.

The MAGCS member is also an environmental steward. We strive to uphold and enhance our surroundings by promoting flora and fauna in every facet in a manner that is beneficial to the general public now and in the future.

Celebrate Fall!

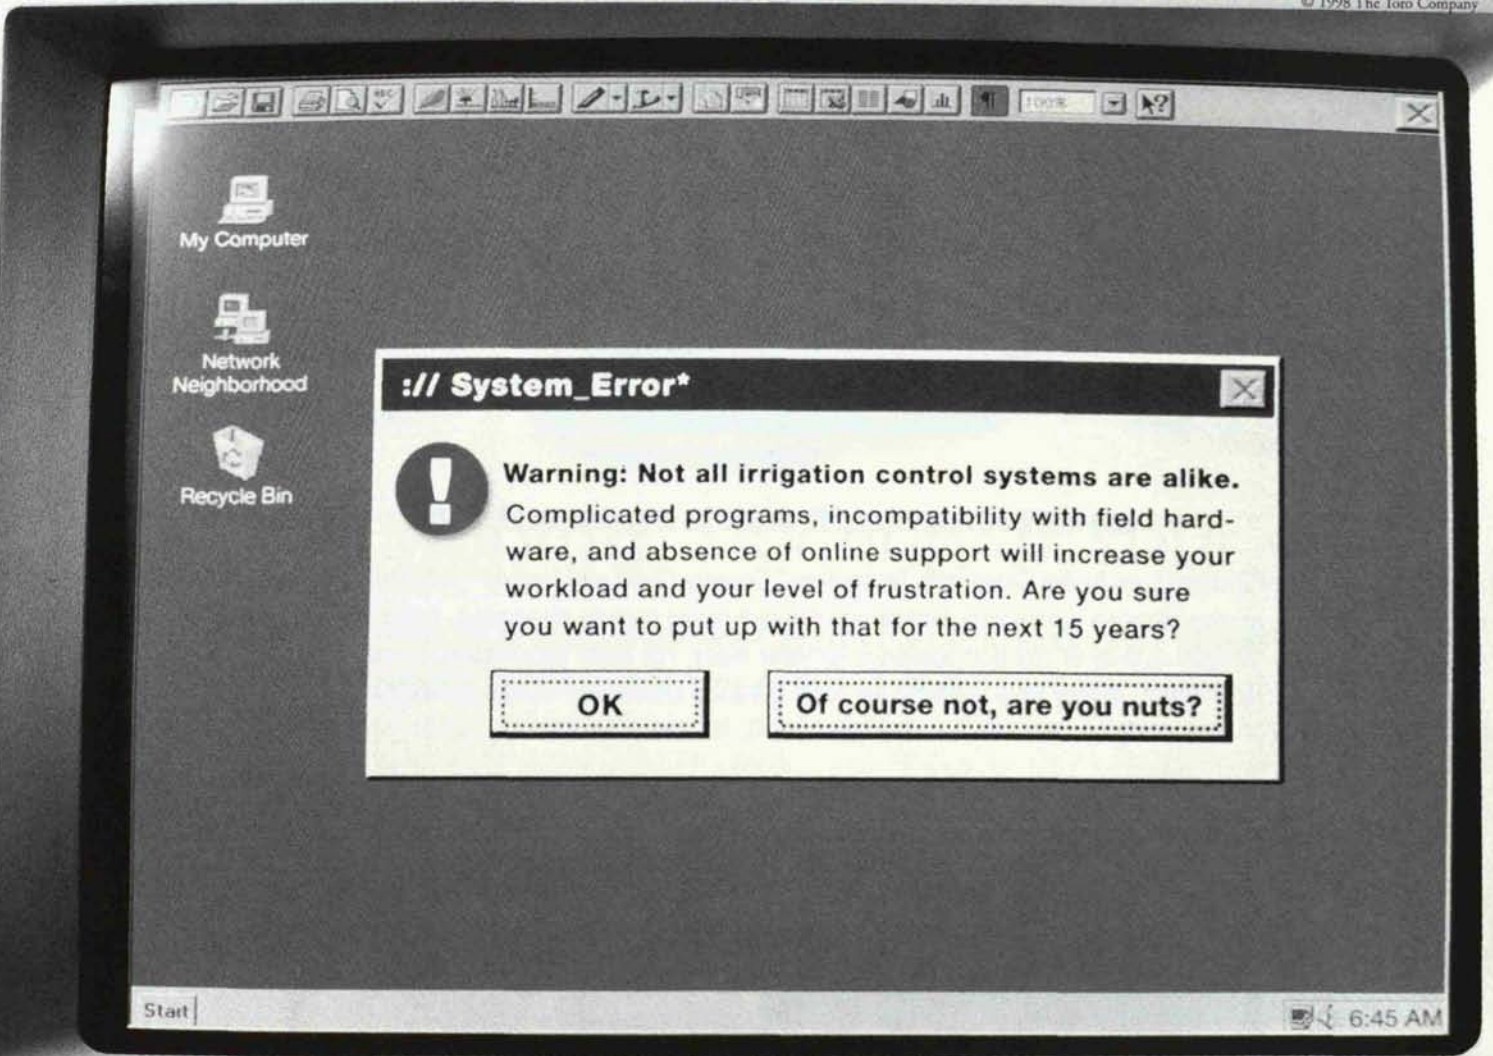

I only have one more chance to get one of these messages to our editor on time. I think the first half of that sentence is more significant to me than the last. Honestly, I had started this in late August and was beginning to croon about all the great weather we had been having during the last half of the month. Frequent rains and cooler temperatures had healed all the minor summer blemishes and "life was good." However, we didn't feel quite so fortunate after we received 5.25" of rain on the evening of August 31. Our life was made easier after "good neighbors" Dennis Wilson, Jim Holtschult and Don Cross donated their fleet of pumps to assist our "deflooding efforts." Just as was the case on the farm where I grew up, the neighbor down the road apiece helps you out when you are down. Hopefully, we can repay the favor sometime.

Regardless of the weather or the scope of your fall projects, I hope everyone can catch their breath this fall and attend some of the following events.

*October 27 –
Remember to turn
those clocks back
when you go to bed.
Yippee, it will be
dark at 5 p.m.;
no more 12-hour
days and I've been
looking forward
to getting that hour
of sleep back all
summer!*

- October 12 – Illinois Golf Hall of Fame induction ceremony at the new Glen Club in Glenview. Our very own Ray Gerber will become the second from the superintendents' ranks to join this distinguished group. Past president Bob Williams was inducted in 1990. Ray was the superintendent at Glen Oak for 35 years, was a long-time editor of *the Bull Sheet*, served as MAGCS president three times and GCSAA president once, and received GCSAA's Distinguished Service Award in 1975. Ray will be joining new inductees Tommy Armour (legendary Medinah head professional), current U.S. Senior Amateur champion Bill Shean and PGA Tour veteran D.A. Weibring.
- October 17 – MAGCS College Championship/ITF Fundraiser at Silver Lake Country Club. Dudley Smith, the senior superintendent in Chicagoland, will be our host and will no doubt be sporting some sort of gaudy Nittany Lion garb. Aside from being an important fundraiser for turf research, this is an excellent opportunity to hoist a toast to a living legend as his 40-plus years at Silver Lake draw to a close. Congratulations on an outstanding career, Dudley!
- October 20 – Annual Fall Dinner Dance, to be held at Bryn Mawr Country Club. This is a perfect opportunity to spend a night out with your significant other. Don't forget all the sacrifices they make during the growing season! My club is excited about hosting the event and

Time to Step Up:

Host a Monthly Meeting at Your Club

As another year comes to a close, with most of us (I wish it were me!) buttoning up our fall course-improvement projects, it is time to reflect on this past year's golf meetings. Our meetings took us to some great venues in three different states. If you missed any of the meetings, you truly missed some special golf courses. I would like to take this opportunity to thank our hosts: Dan Albaugh, Phil Zeinert, Ron Fox, Jim McNair and Harry Lovero, Dan Tully and this month's host, Mr. Dudley Smith.

Sure, it takes time and effort to go to your board, manager or whoever is responsible for scheduling outings. It is time to make the effort, to "cash in" a few favors and host a meeting.

It has become very difficult to find venues that can accommodate the MAGCS. In the past, many clubs would volunteer their courses for our monthly meetings. It would cost our members very little to attend and participate. Unfortunately, times have changed; most clubs are not in the position financially to offer the MAGCS a free ride or, for that matter, the available time that could be used by another organization. We are fortunate to have many sponsors to help supplement the cost of our meetings and we should all be grateful for their generosity.

What bothers me is that we have those in our Association who complain about the cost of our meetings. They also say, "Why do we have to go to a meeting at such-and-such a place when we just had a meeting there a few years ago?" Or, "I'm not going to drive all the way there." I have four words to share with you: Shut your pie hole!

Sure, it takes time and effort to go to your board, manager or whoever is responsible for scheduling outings. Think about all the great venues, great times and great fellowship we have shared at MAGCS meetings. It is time to make the effort, to "cash in" a few favors and host a meeting. I know, I know—you're all saying, "Mumper, put your money where your mouth is." I will be hosting a meeting sometime in the year 2003.

Now it is your turn. We will have sign-up sheets for meeting slots at our November meeting at Medinah. Don't wait until then; sign up now by calling either Kevin DeRoo or me to reserve your date.

Employee Orientation — It's a Start

Does this sound familiar? It is April 1 and you are scrambling around looking to hire employees for the season. A prospective employee stops by and asks for a job. You conduct a thorough interview and offer him or her a position on the crew.

Orientation is conducted by one of our crew foremen, both of whom are bilingual. This allows the new hire to receive training from a senior member of the crew. It also validates the foreman's position as a crew leader and a supervisor.

The only problem is that the thorough interview consists of checking your prospect for a pulse, holding a mirror to his mouth to see if he is breathing and shaking his hand to see if the core body temperature is above 50 degrees. If he or she happens to pass any one of these requirements, the individual is then hired on the spot. Within minutes, this new employee is paired up with a fellow employee and is out raking bunkers, mowing greens or using a weed-eater, being a productive member of the crew.

For me, this hiring methodology was all too familiar. Then last year, as I reviewed our final payroll summary, I was shocked to discover that even with a peak summertime crew of 19 employees, I had more than 35 different employees on payroll in my department. This worked out to an annual turnover rate of 85%. Is it any wonder that we had struggled with consistency in the quality of our work? Maybe our quality wasn't consistent because our crew wasn't consistent.

Over the winter, we targeted this as an area where we wanted to make improvements. We reviewed our recruiting techniques, compensation, benefits and our training program. While all of these topics are worthy of discussion, this article focuses on changes we made to improve our training program. We wanted to make sure that once we did hire employees, we were providing them with proper training so that they would understand their new job and what would be expected of them.

To accomplish this, we decided to implement a formal employee orientation program. As we worked to develop this program, it quickly became apparent that we would first need to take one giant step backward and prepare a series of written documents upon which we would base our program. These documents include:

- Employee application form;
- Job description;
- Job offer;

- Safety policies;
- Hazard-communication training program;
- Lightning-safety policy;
- Work rules and standard of conduct statement;
- Lock-out /tag-out policy;
- Open door grievance policy;
- Spill-response training;
- Disciplinary policy; and
- No-solicitation policy.

Once finalized, these documents were compiled into an employee manual. This manual became the cornerstone of our orientation program. We had the employee manual translated into Spanish and it, along with a series of bilingual training videos, allows us to offer our orientation program to all new employees in either English or Spanish.

Orientation is conducted by one of our crew foremen, both of whom are bilingual. This allows

the new hire to receive training from a senior member of the crew. It also validates the foreman's position as a crew leader and a supervisor. As the foreman conducts the orientation session, he works off of a prepared outline. This helps assure that each orientation session has covered the same material. As the foreman covers each item on the outline, he checks it off. At the end of the orientation, this checklist and an

employee sign-off sheet are stapled together and put into the employee's personal file.

The employee sign-off sheet appears at the end of the employee manual. After each topic in the manual is discussed, the employee turns to the sign-off sheet and initials the proper subject (safety rules, sexual harassment policy, hazard communication training,

ph: 708-444-2177
fax: 708-444-2199

etc.). When the entire orientation session is complete, the employee signs and dates the sheet and turns it in to the superintendent. The employee keeps the manual for his/her own reference.

New Employee Orientation: Step by Step

We do orientation on the first day of a new hire's employment. This is often inconvenient. It can interfere with our planned work schedule, especially since it ties up one of our crew foremen, but it is important to cover this material as early as possible so that everyone gets started out on the right foot. The break room is the setting for conducting all orientation.

As the foreman conducts the orientation, he works off the following outline:

1. Verify that the job application form has been completed and turned in.
2. Verify that the employee has had an opportunity to review his/her written job description.
3. Verify that the employee has received and accepted a job offer for the position for which he/she has been hired.
4. Verify that the employee has completed I-9 and W-4 forms and has provided the superintendent with documentation of I-9 eligibility.
5. Assign the employee a locker and put his/her name on it.

6. Issue the employee his/her safety equipment:
 - hard hat;
 - rain gear;
 - ear protection;
 - work gloves; and
 - safety glasses.
7. Review uniform policy with the employee. Have him/her complete the uniform agreement.
8. View the video titled "This is a Golf Course" and go through video training booklet.
9. Go through the Employee Manual, pages 4-6:
 - Introduction;
 - Equal Employment Opportunity;
 - Employment Categories;
 - Hours/Leave/Pay; and
 - Job-Related Injuries and Accidents.
10. View the video titled "Safety Basics on the Golf Course" and go through video training booklet.
11. Go through the Employee Manual, pages 6-12:
 - Safety Policies;
 - Lightning Safety;
 - Rules, Standards of Conduct and Disciplinary Action;
 - Employee Areas and Personal Equipment;
 - Sexual Harassment Policy; and
 - Solicitation Policy.
12. View video titled "Crew Etiquette" and go through video training booklet.
13. Go through Employee Manual, pages 13-16:
 - Before You Start Work;
 - Employee Benefits; and
 - Employee Golf.
14. View video titled "Hazard Communications Training" and go through video training booklet.
15. Go through Employee Manual, pages 17-22:
 - Hazard Communication Training;
 - Spill Response Training; and
 - Lock-out/Tag-out Training.
16. Verify that employee has completed and signed "Acknowledgement Form." This form documents that the employee has received training regarding specific club policies. Turn the acknowledgement form into the superintendent.

(continued on page 10)

Figure 1.

Top 20 List

- 1.) Arrive to work on time.
- 2.) Never put your hands or feet by a cutting unit while equipment is running.
- 3.) Fix ball marks daily.
- 4.) Use a dew whip daily.
- 5.) Wear appropriate uniform and hard hat daily.
- 6.) Never engage or disengage P.T.O. or cutting units while the motor is running at a fast idle.
- 7.) Speed limit on the course and around the shop is 10 mph.
- 8.) Weekend work is required.
- 9.) Do not put grass in the paper dumpster or vice versa.
- 10.) Do not make sharp turns with the equipment. All turns should be "teardrop"-shaped turns.
- 11.) Do not mow over bunker rakes, golf balls or paper trash.
- 12.) When mowing, you must move all ropes and stakes and return them to their proper location when finished.
- 13.) Any equipment being transported in a trailer must be secured with a bungee cord and the tailgate on the trailer must be secured.
- 14.) Carts and equipment are not allowed to travel through the parking lot. Use the cartpaths.
- 15.) Fill your equipment with fuel in the morning before going out and in the afternoon when you are finished.
- 16.) Do not disturb the golfers.
- 17.) Disciplinary action = Verbal warning with retraining
= Written warning with retraining
= Suspension with written guidelines and retraining
= Termination
- 18.) No use of cell phones or radios while working.
- 19.) Clean all equipment daily.
- 20.) Clean out carts daily, return all tools to their proper location and park the equipment in its proper spot.

17. Review the "Top 20 List" (Figure 1). This is a list of topics that we have found we need to constantly review with both new and veteran employees.
 - Gas can cabinet: no smoking, gas vs. diesel vs. gas/oil mixture, if unsure when fueling equipment ask the mechanic.
 - Fuel pump: no smoking, gas vs. diesel, if unsure when fueling equipment, ask the mechanic.
 - Dumpsters: landscape vs. paper. Review proper disposal of paper trash, aluminum cans, landscape waste.
 - Equipment wash-up areas: wash all equipment daily.
 - Employee parking area.
 - Shop cleaning duties: daily, weekly.
 - Proper parking of equipment in the shop. All carts cleaned out nightly. All tools returned to their proper location.
18. Take the employee on a shop tour:
 - Mechanics area: no working on personal vehicles, no unauthorized use of shop tools or supplies.
 - Fire extinguishers: location and use.
 - Eye-wash stations: location and use.
 - First-aid kit: location, report all injuries to supervisor.
 - Hazard communication station and location of MSDS sheets.
 - Lock-out/tag-out station: location and use.
 - Spill response station: location and use.
 - Rinsate pad: location and use.
19. View the video titled "The Knowledgeable Operator" and go over video training booklet.
20. Train the new employee to operate a carry-all.
21. Train the new employee to operate a Cushman.
22. Give the employee a scorecard that contains a map of the golf course. Explain that it is important that he/she learns the layout of the course and the difference between a green, a tee, a fairway, a bunker, the intermediate rough and the rough. Teach the employee to use the tee signs to help guide him/her through the course.
23. Give the employee one of the superintendent's business cards. On the business card, use a highlighter to mark the phone number for the shop. Explain to the employee that if he can not make it in to
