

# King of the Hill.

**JACOBSEN® AR-5™**

When it comes to providing superior conditions in primary undulated roughs, nothing compares to the Jacobsen® AR-5™ fine-cut rotary mower. Its advanced lift-arm and caster wheel design plus its narrow 22 inch decks provide **excellent range of motion** for following undulating terrain and delivering superior quality-of-cut without scalping. On-demand weight transfer combined with a parallel-series traction circuit allows the AR-5 to **climb steep hills with ease**. And, its convertible mulching decks **make quick work of debris**. See for yourself why the AR-5 is at the top of the heap – call your local dealer today or visit [jacobsen.com](http://jacobsen.com) for more information.
